

## BÁO CÁO THỰC HÀNH

### Bài thực hành số 03: Setting up Active Directory in Window Server

**Môn học:** Quản trị mạng và hệ thống

**Lớp:** NT132.N21.MMCL

**Điểm tự đánh giá**

#### THÀNH VIÊN THỰC HIỆN (Nhóm 02):

STT	Họ và tên	MSSV
1	Ngô Tuấn Kiệt	21521034

#### ĐÁNH GIÁ KHÁC:

Tổng thời gian thực hiện	
Phân chia công việc	
Ý kiến (nếu có) + Khó khăn + Đề xuất, kiến nghị	

Phần bên dưới của báo cáo này là báo cáo chi tiết của nhóm thực hiện

## MỤC LỤC

A. BÁO CÁO CHI TIẾT .....	2
1. Workgroup .....	2
2. Setting up the Active Directory and building the domain model .....	4
3. Additonal Domain Controller.....	17
4. The Active Directory Policies.....	24
5. Read Only Domain Controller (Advanced task - optional) .....	26

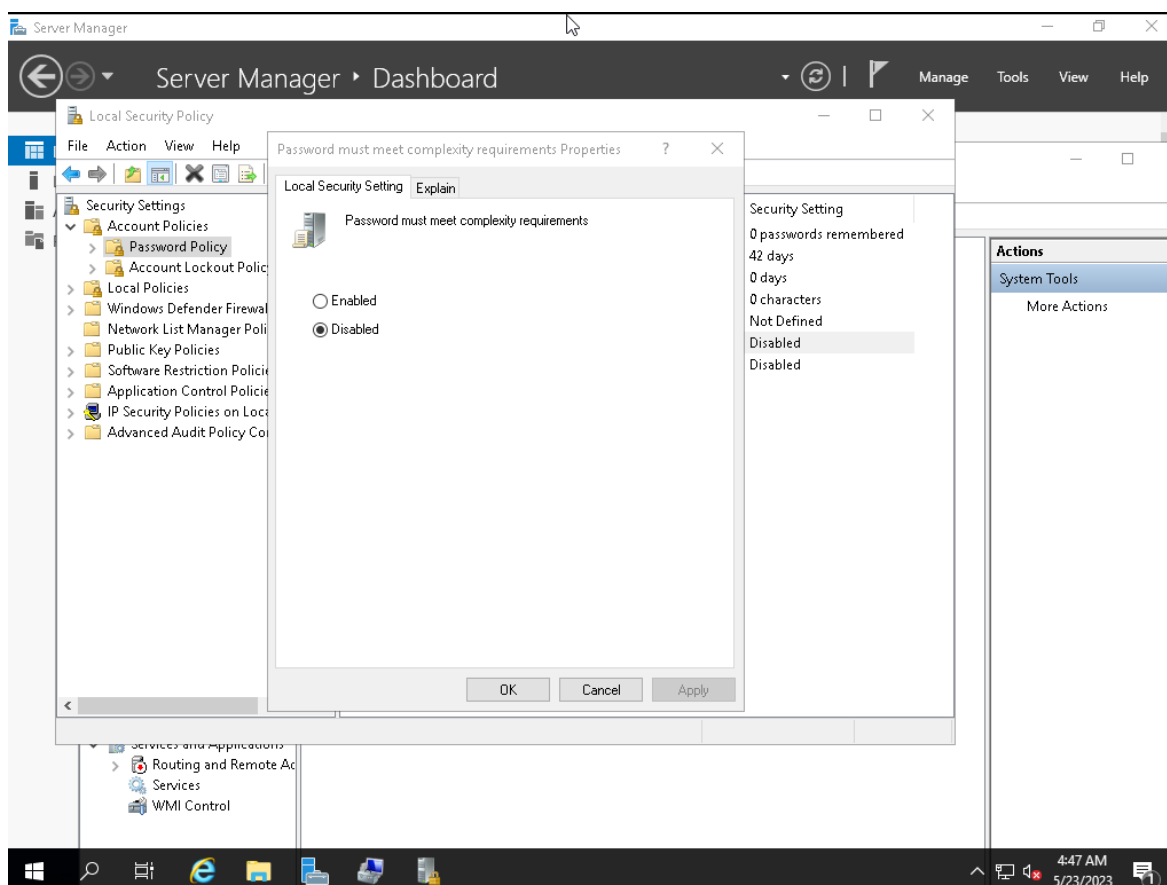

## A. BÁO CÁO CHI TIẾT

Report and demo at class.

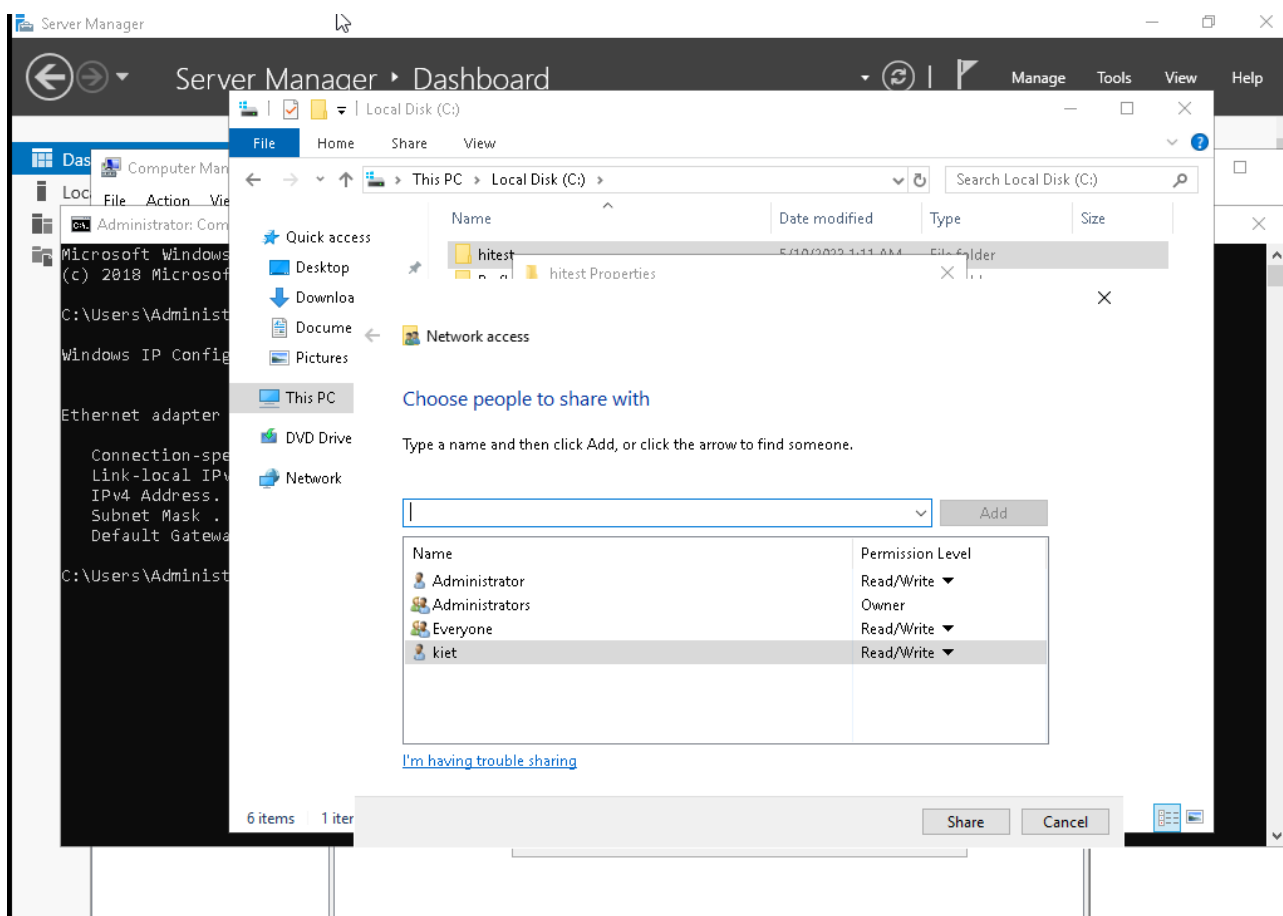

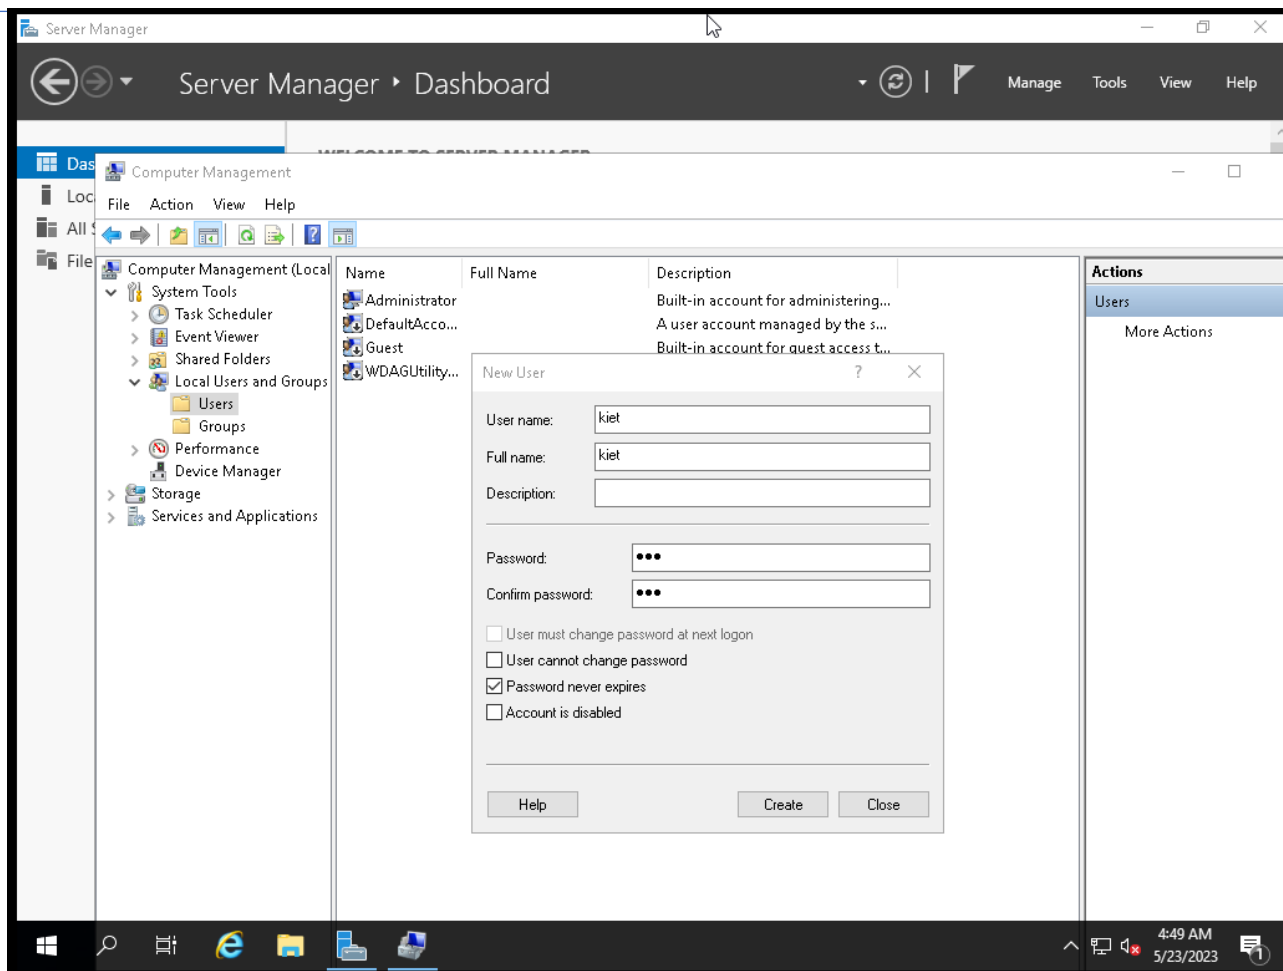

Make sure all your vmware set up as bridge

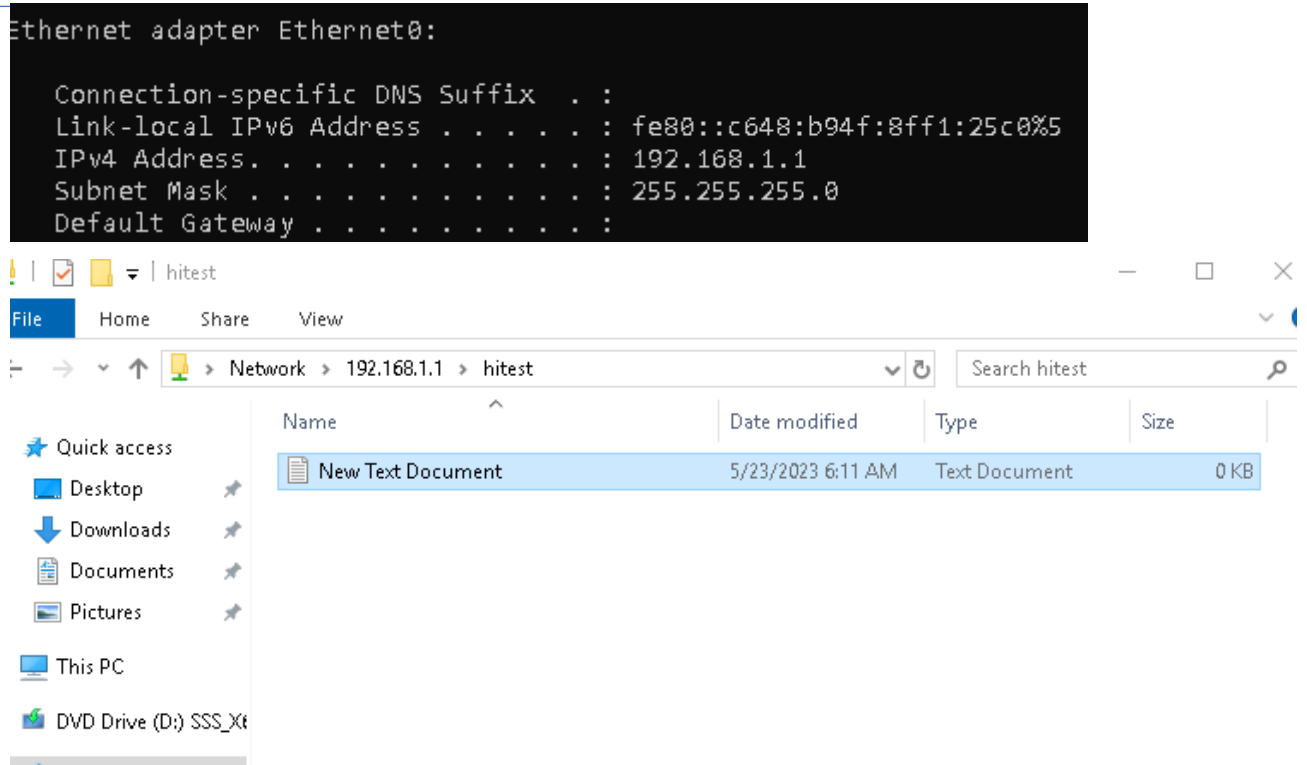

### 1. Workgroup

#### Disable password meet complexity requirements

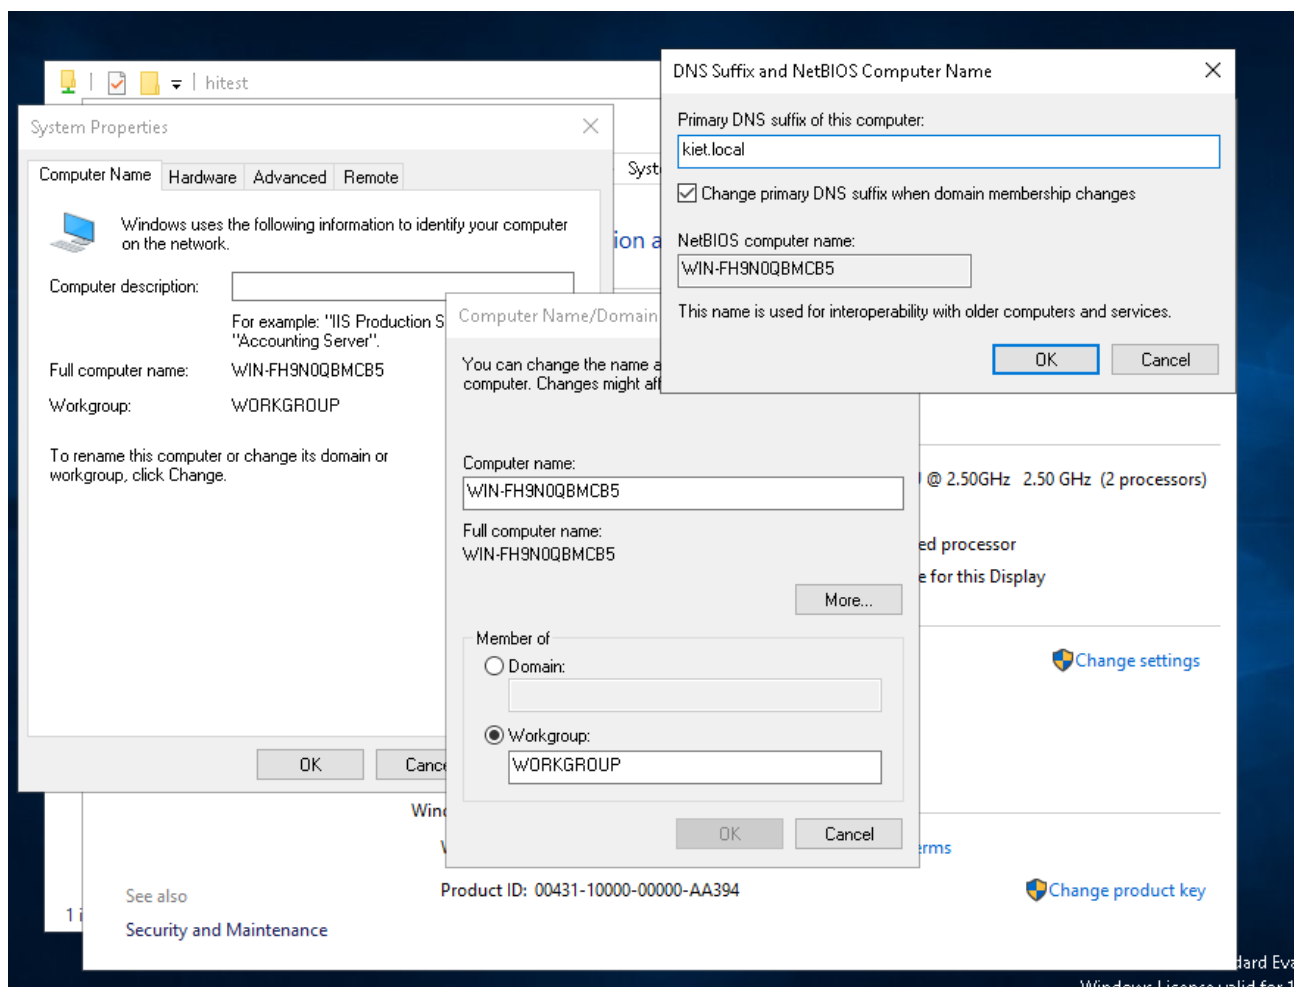

Tools -> Computer management -> User -> New user

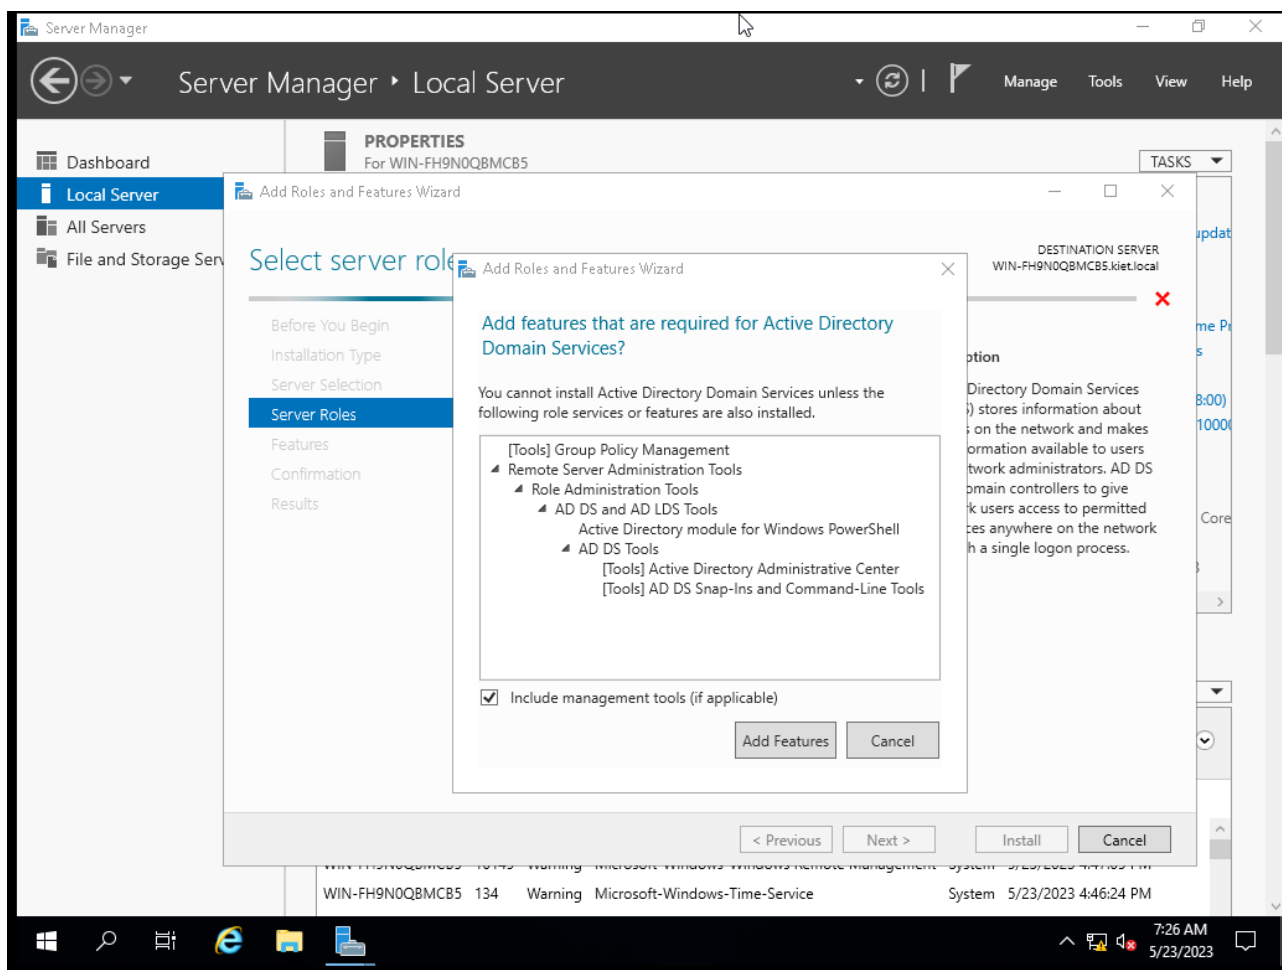

## 2. Setting up the Active Directory and building the domain model

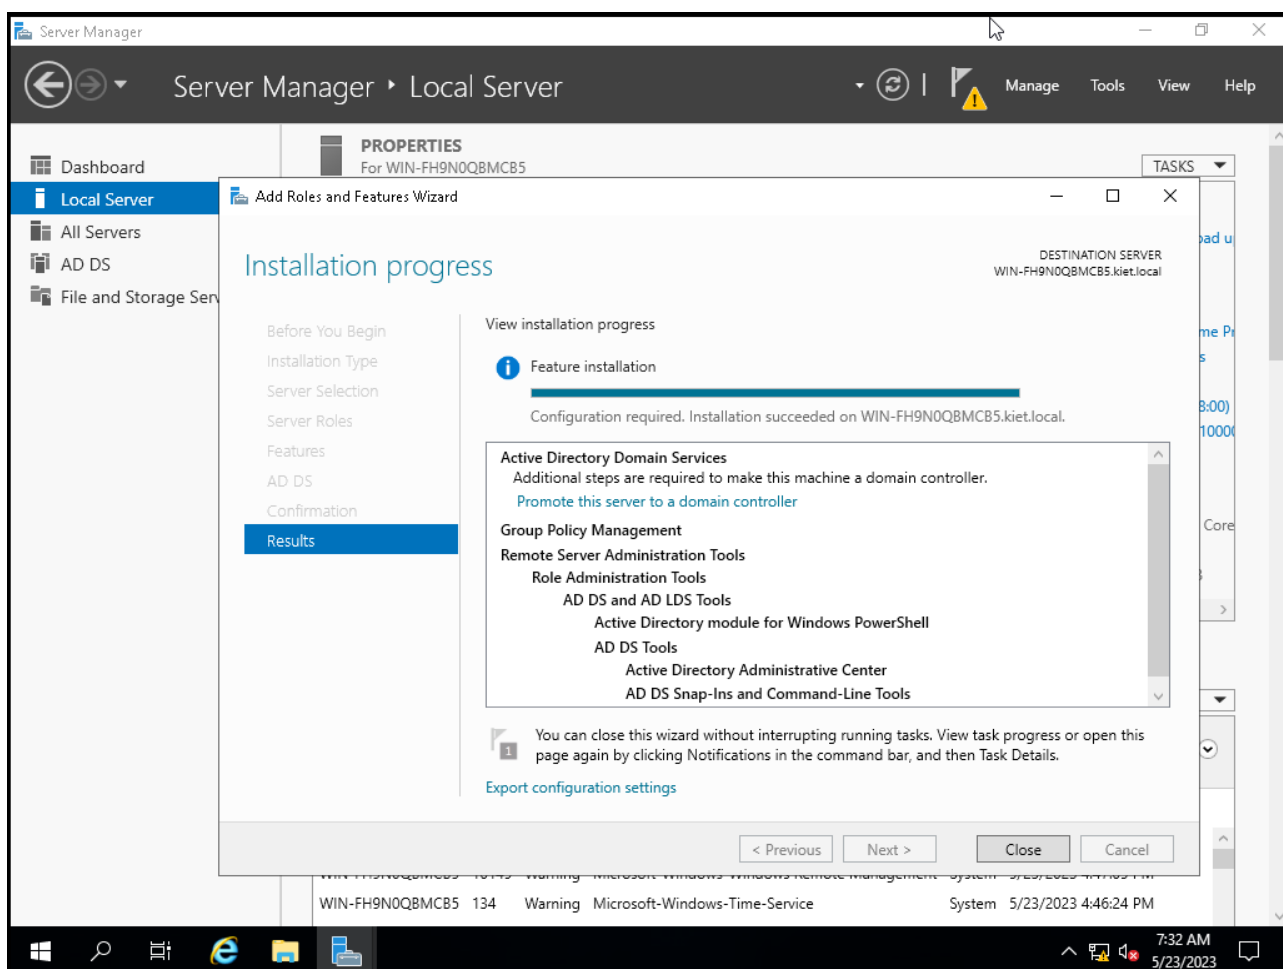

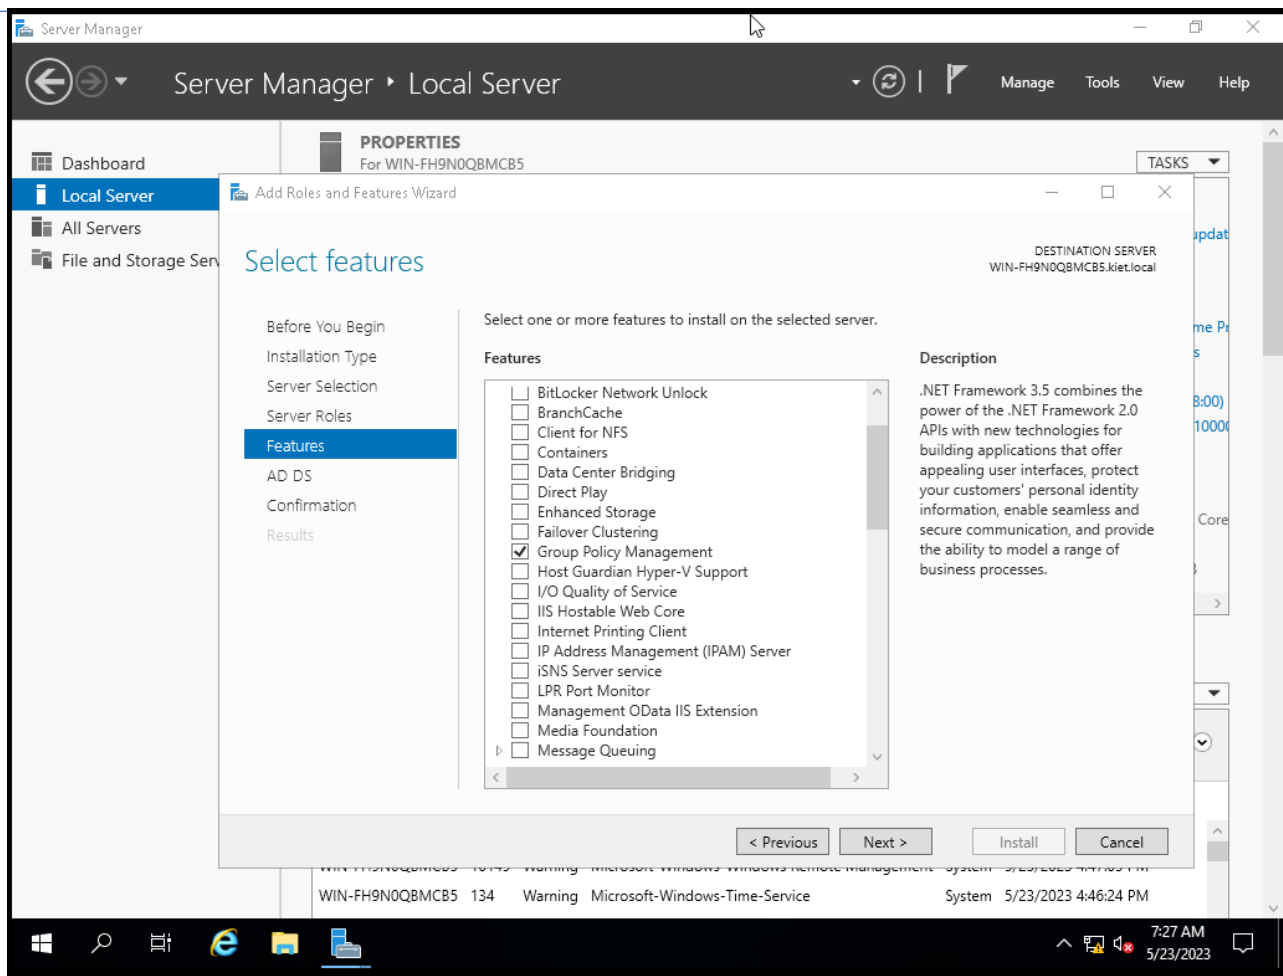

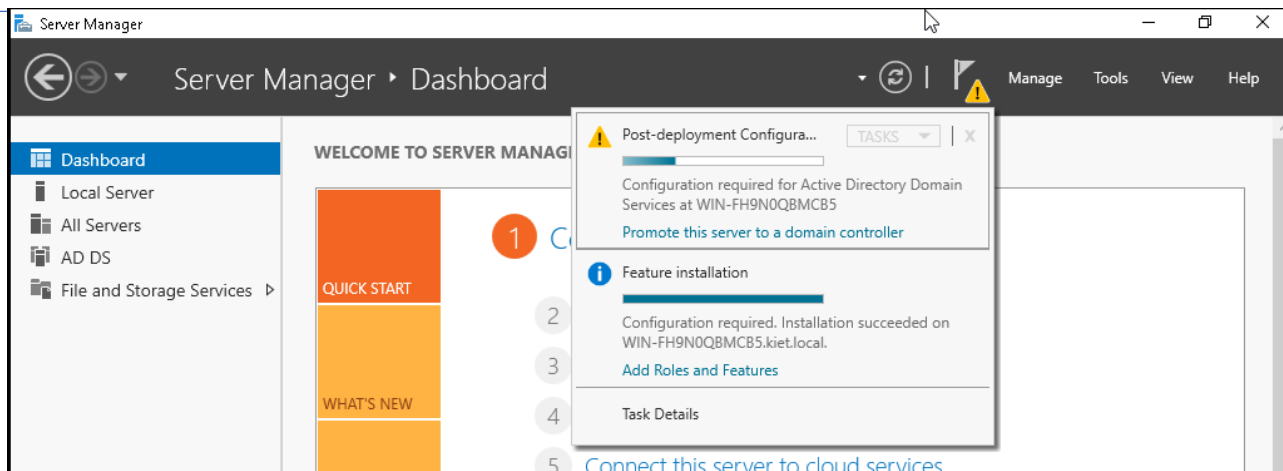

This PC -> properties -> computer name -> change -> more -> set kiet.local

Manage -> Add roles and features -> next next next

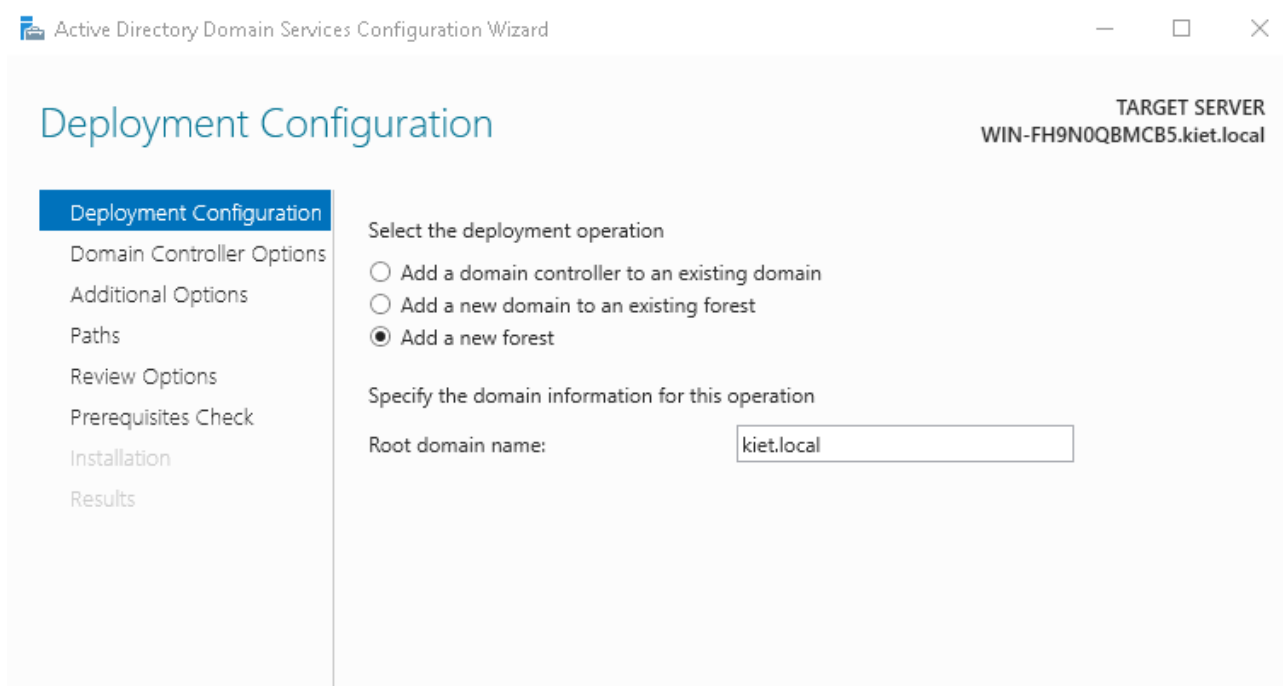

At features, tick group policy management

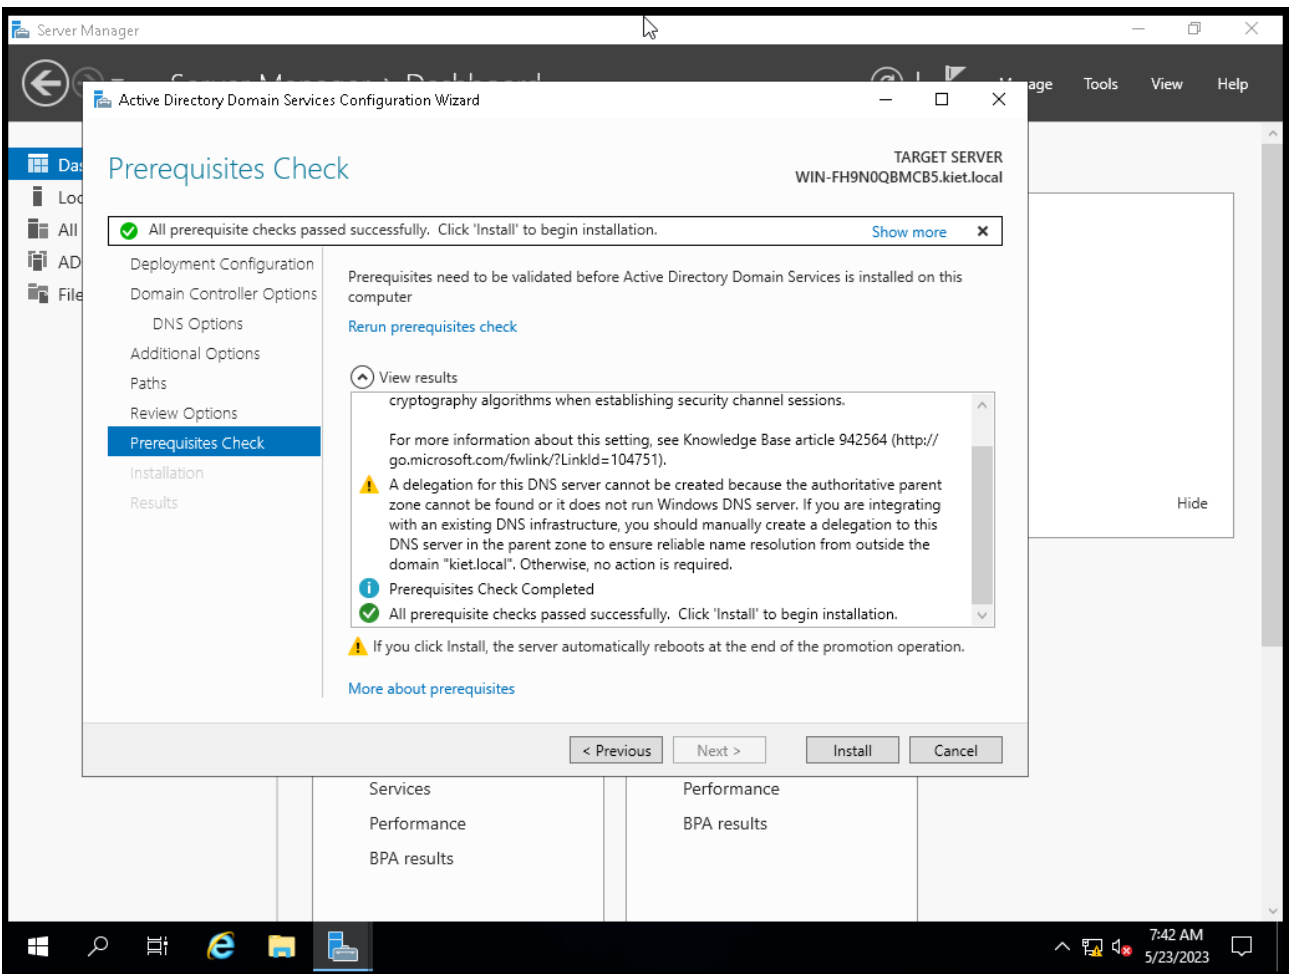

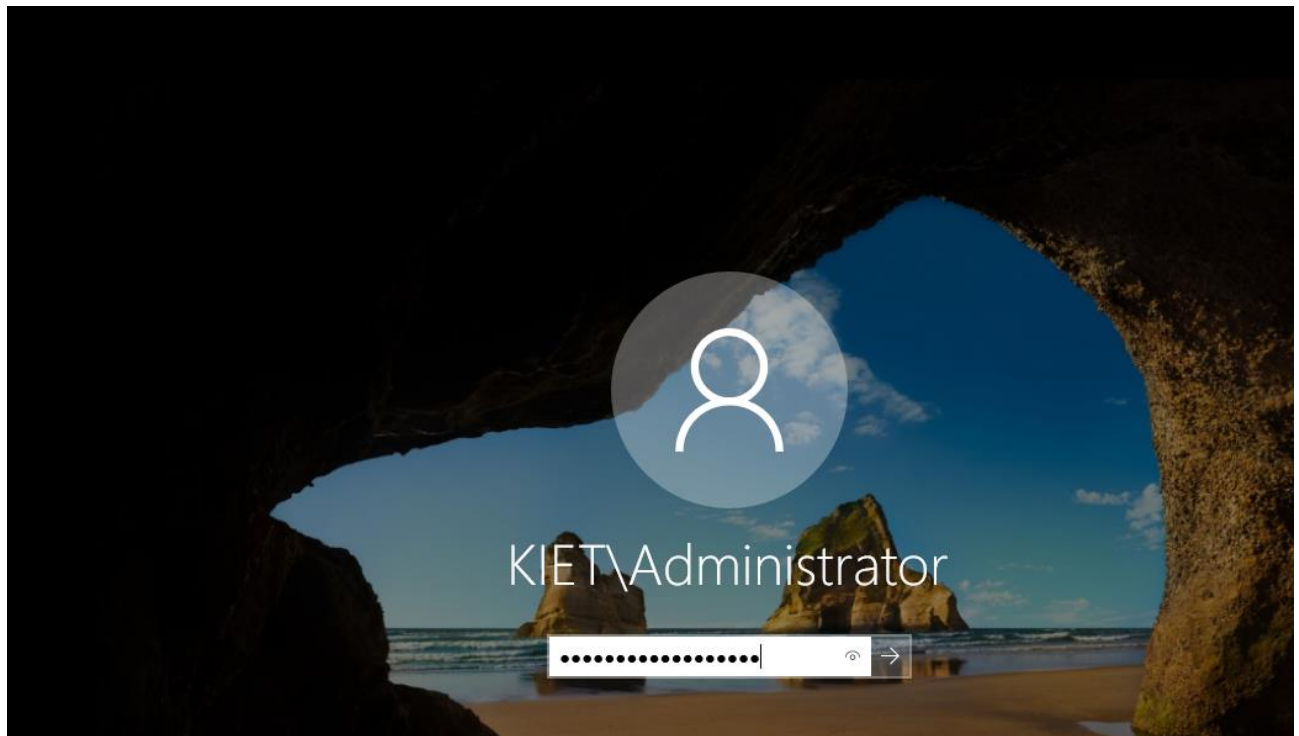

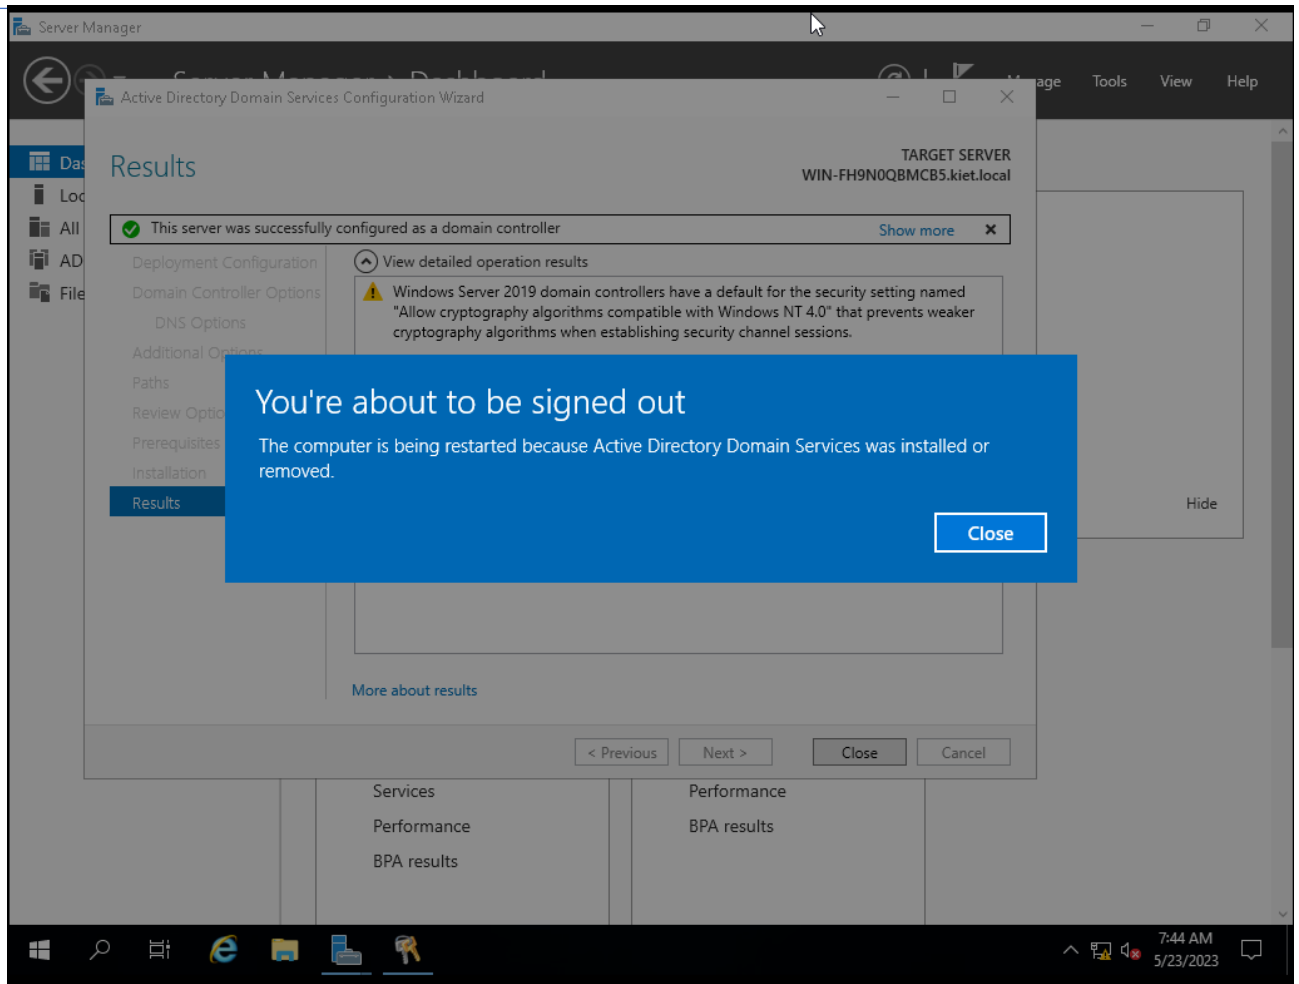

Promote this server to a domain controller

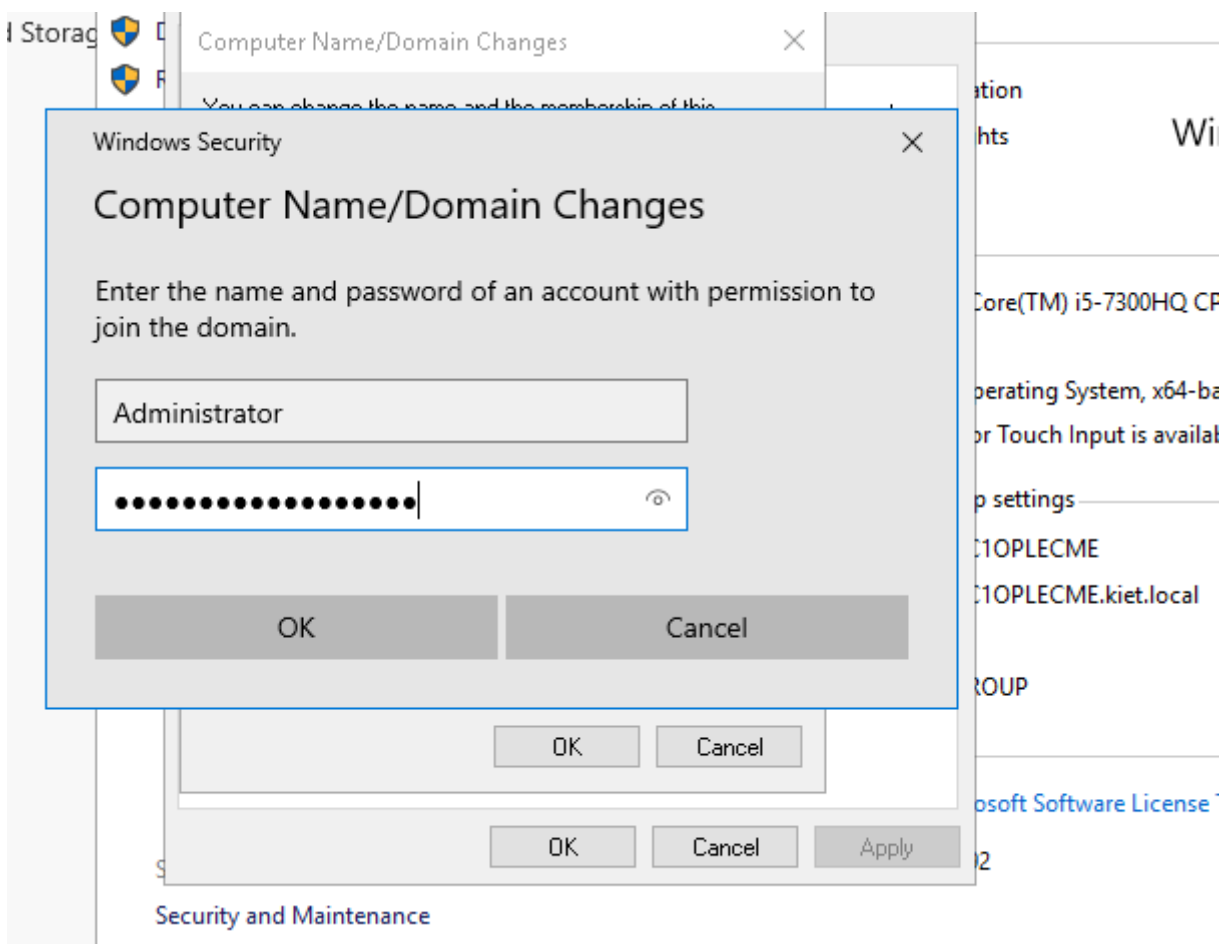

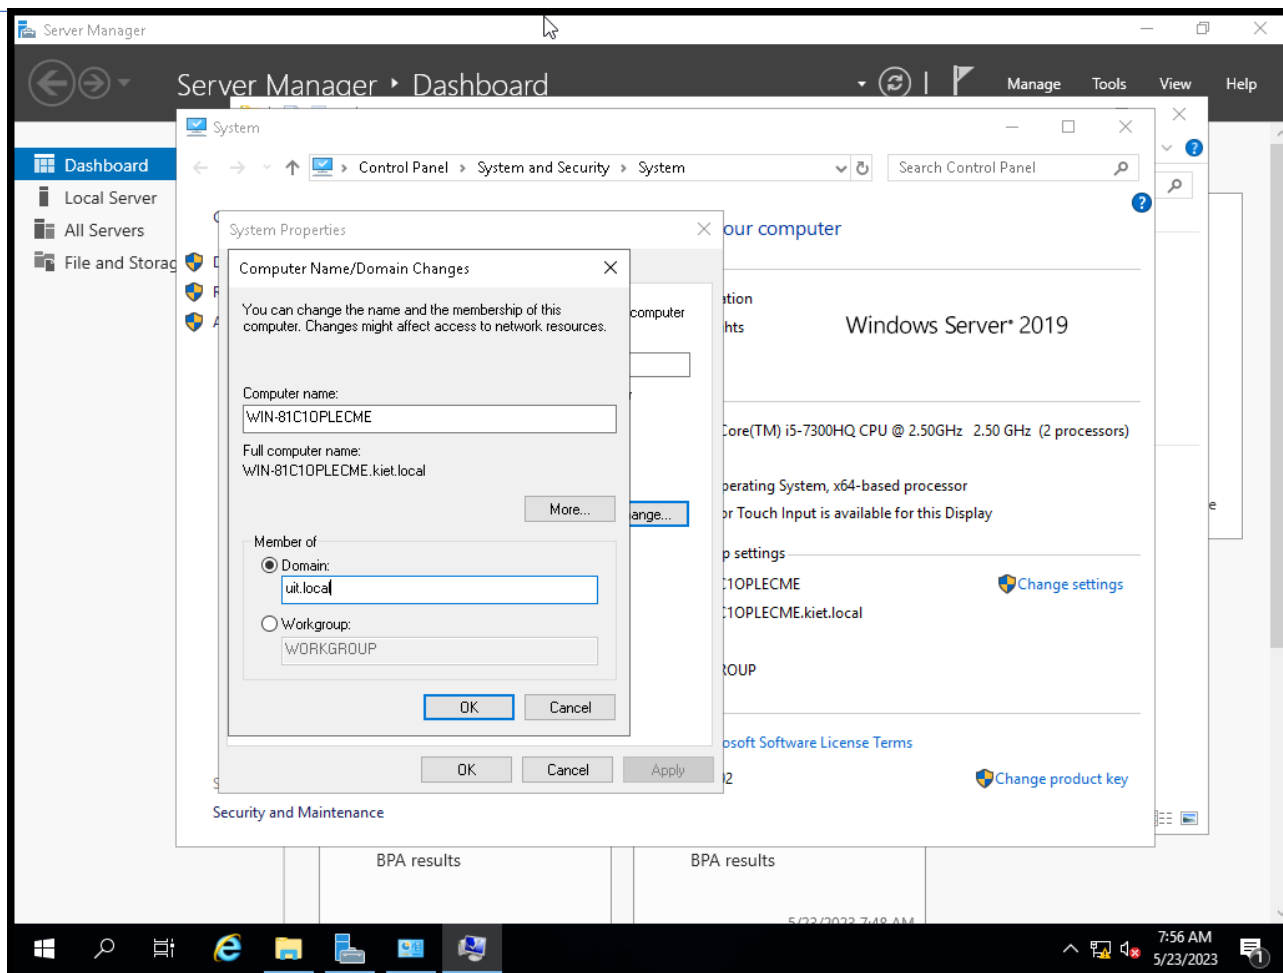

➔ Add a new forest

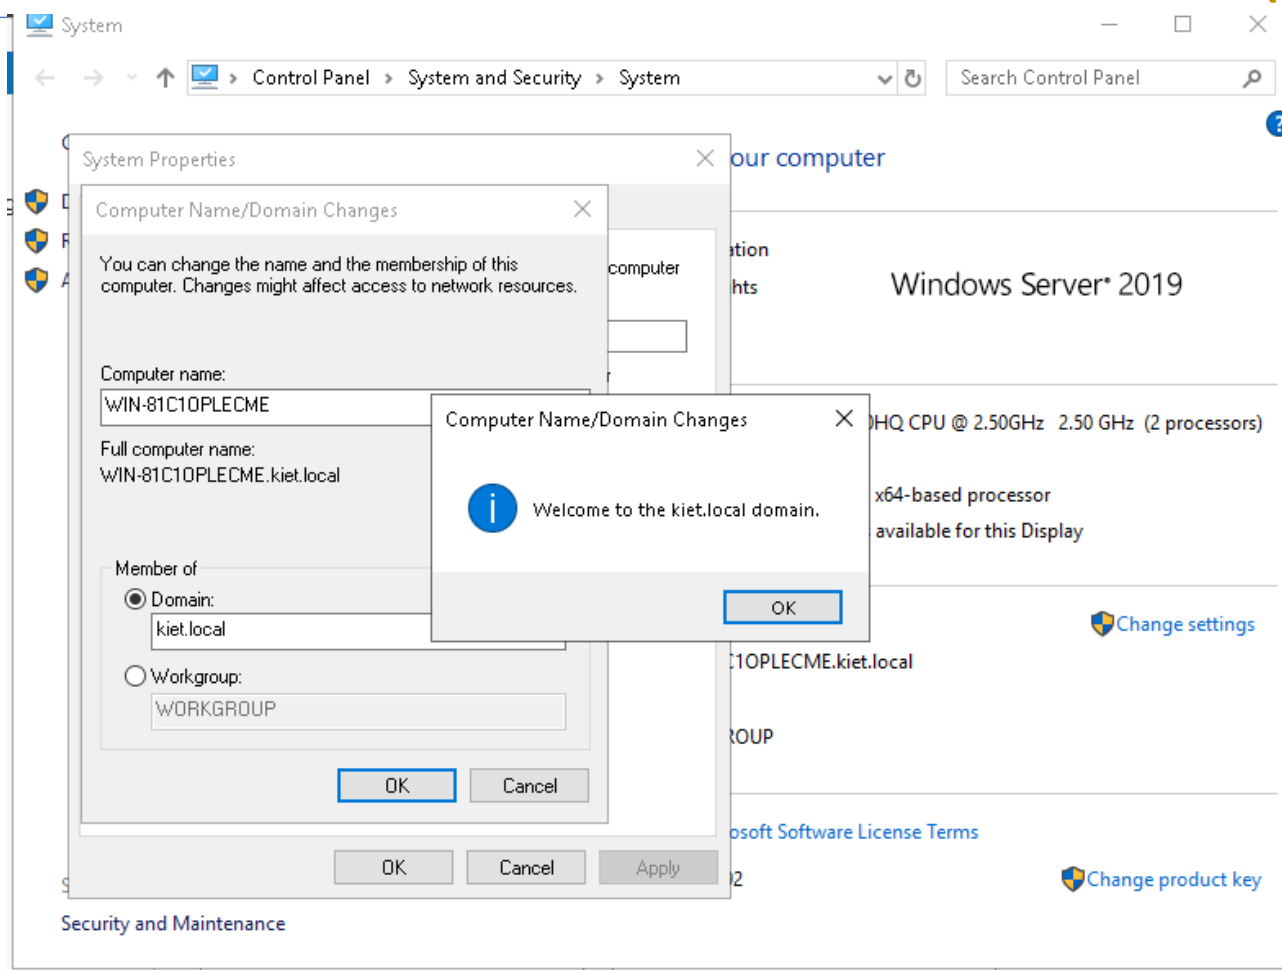

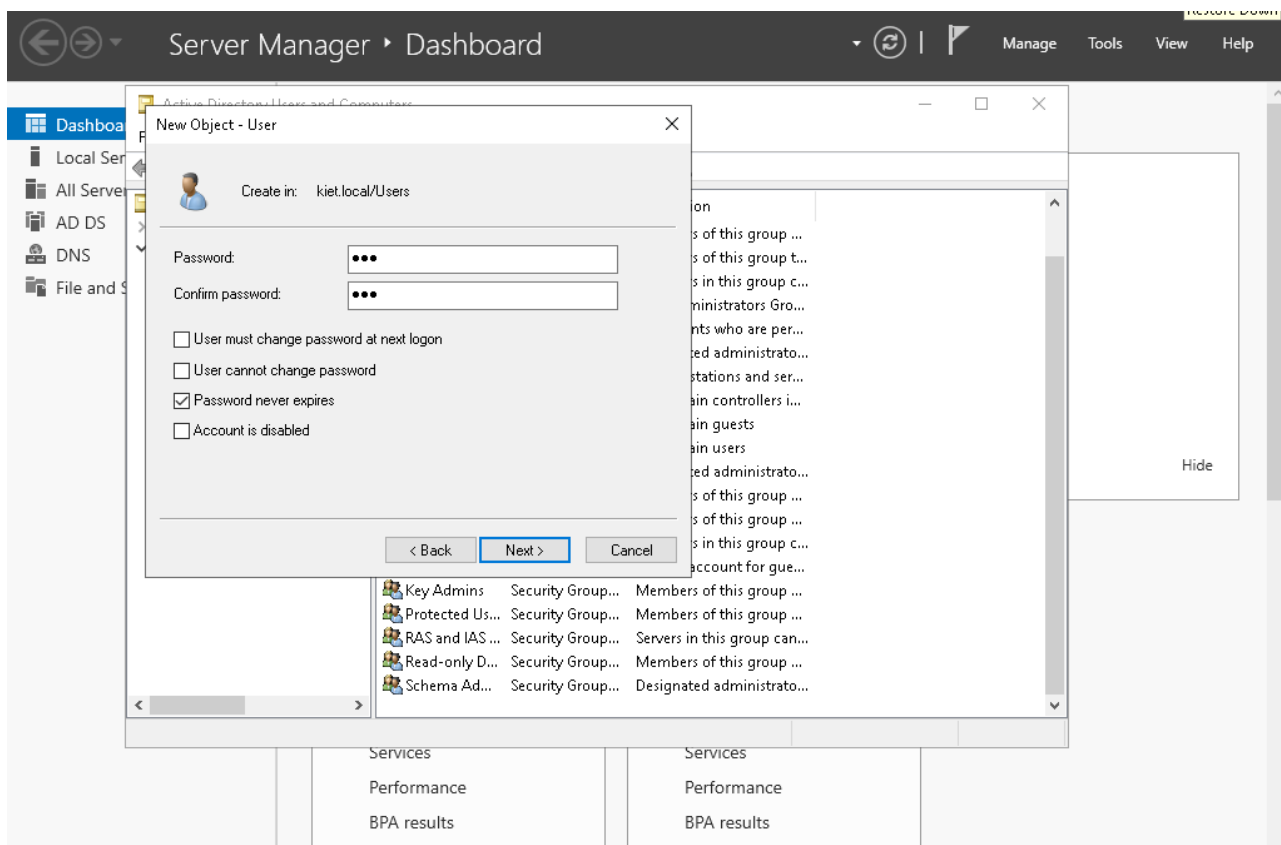

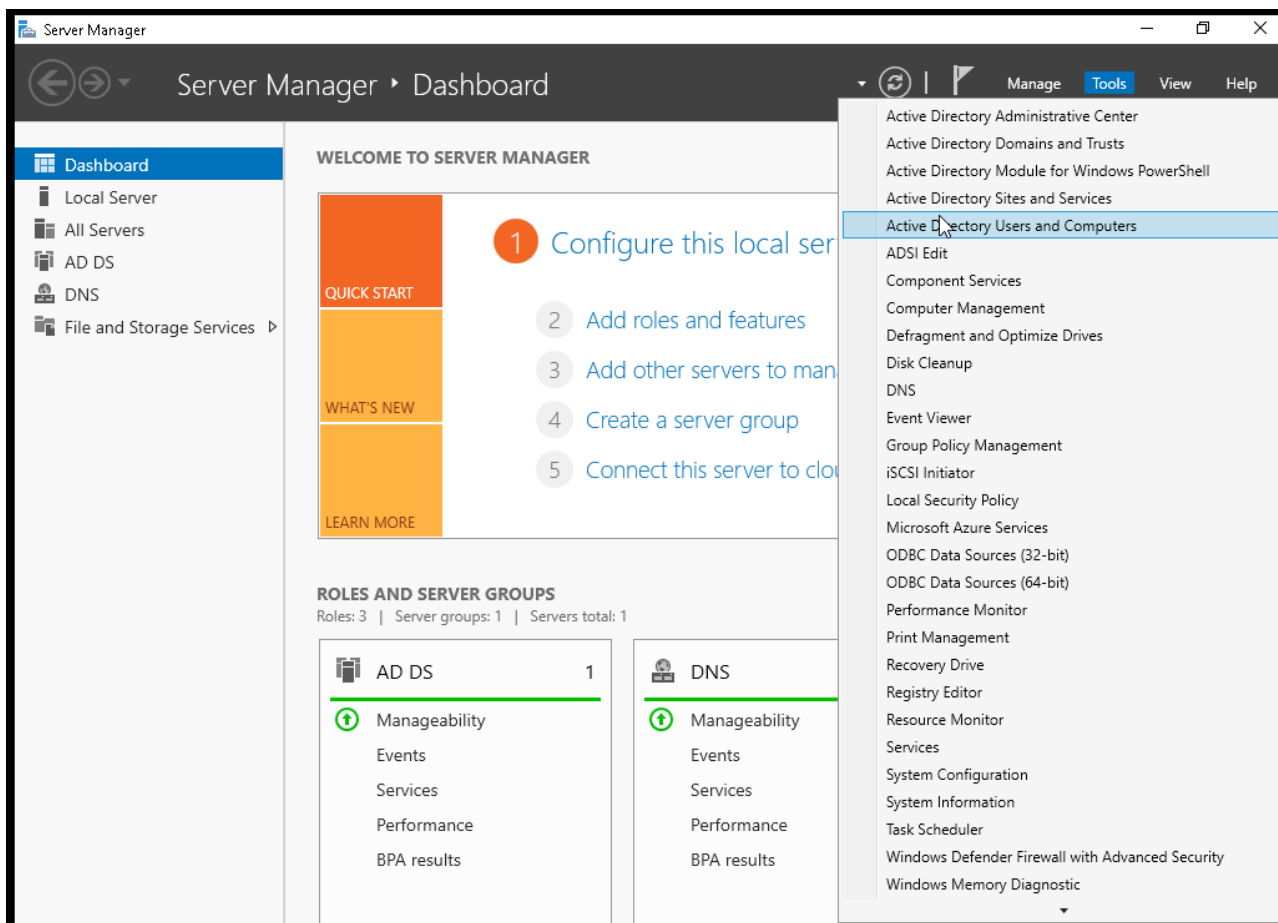

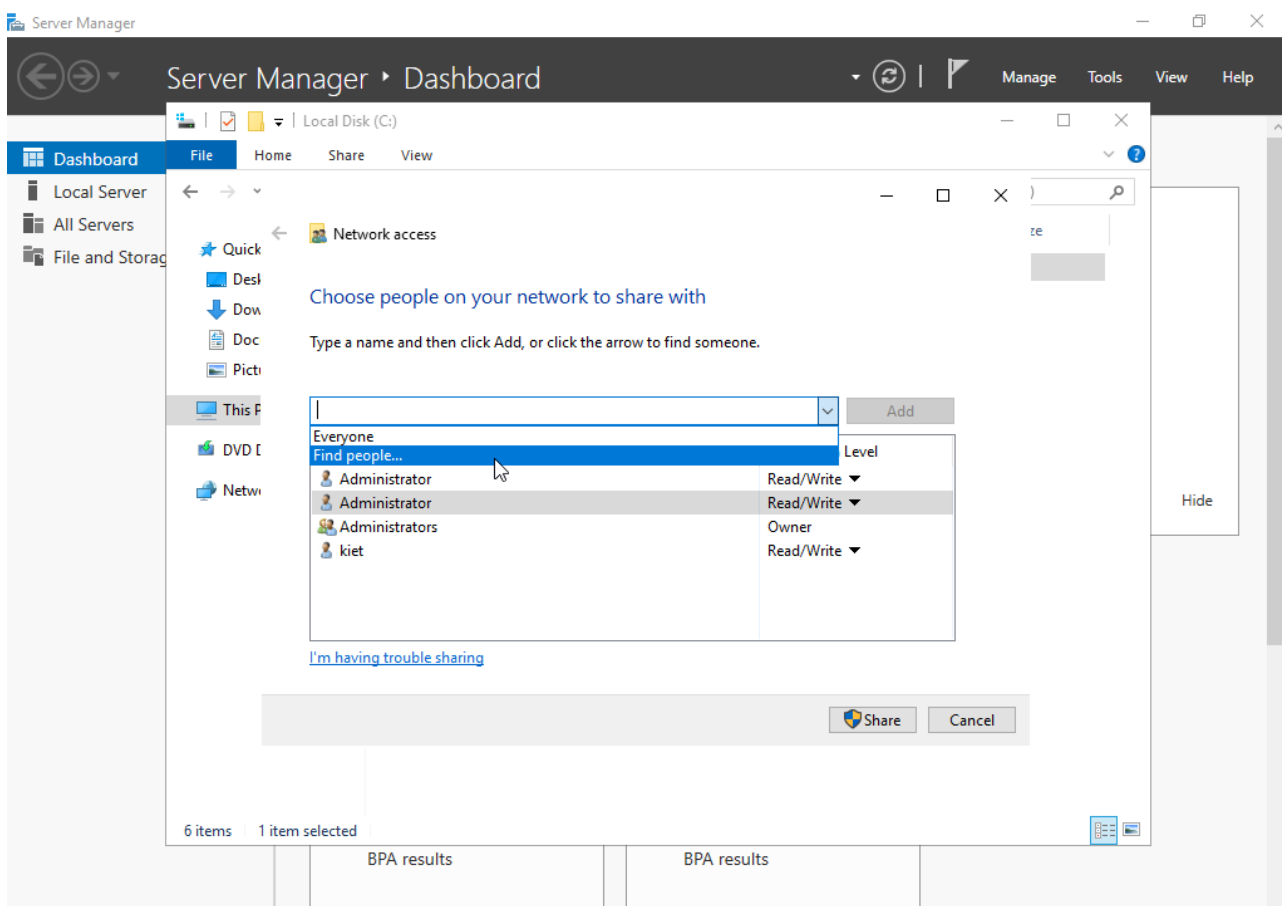

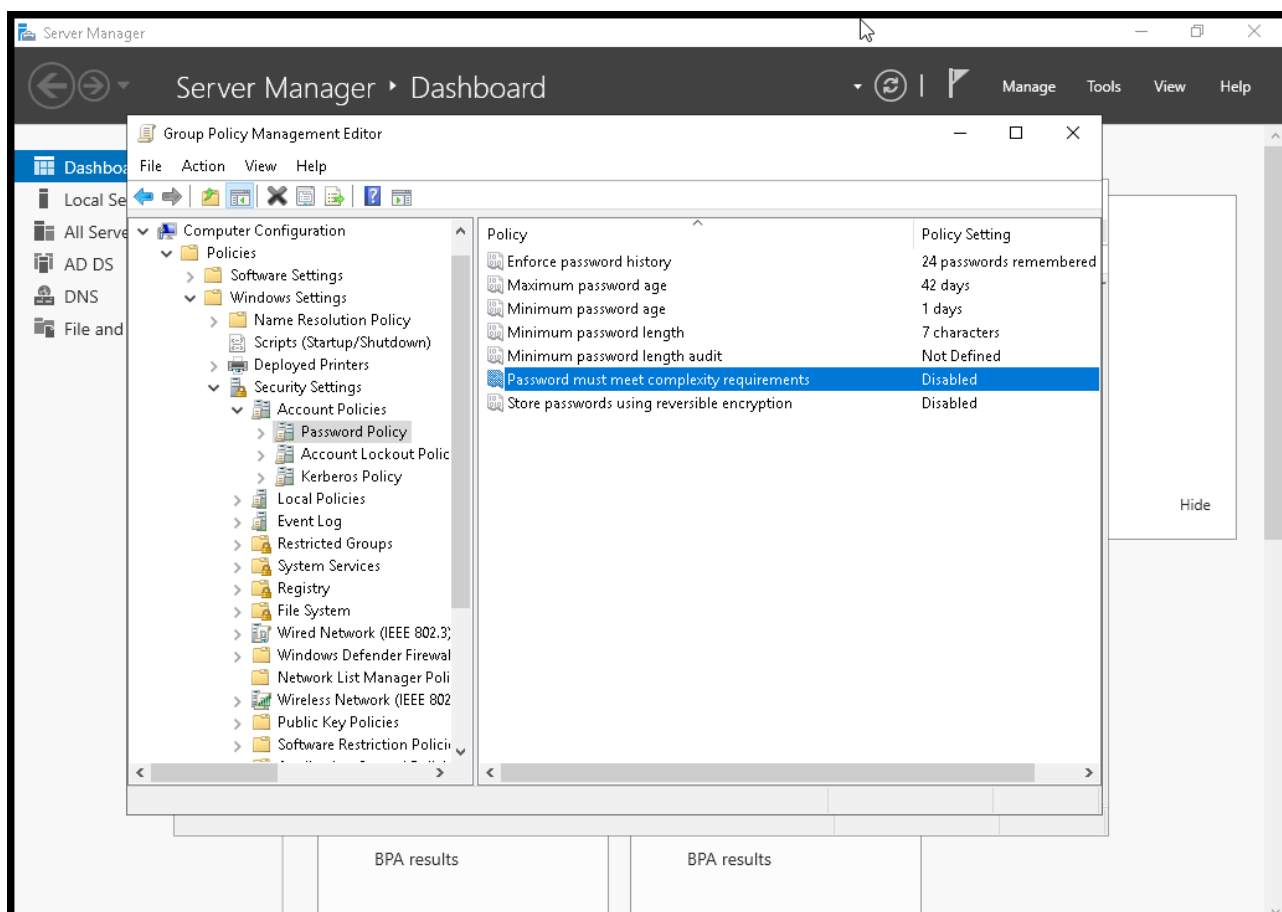

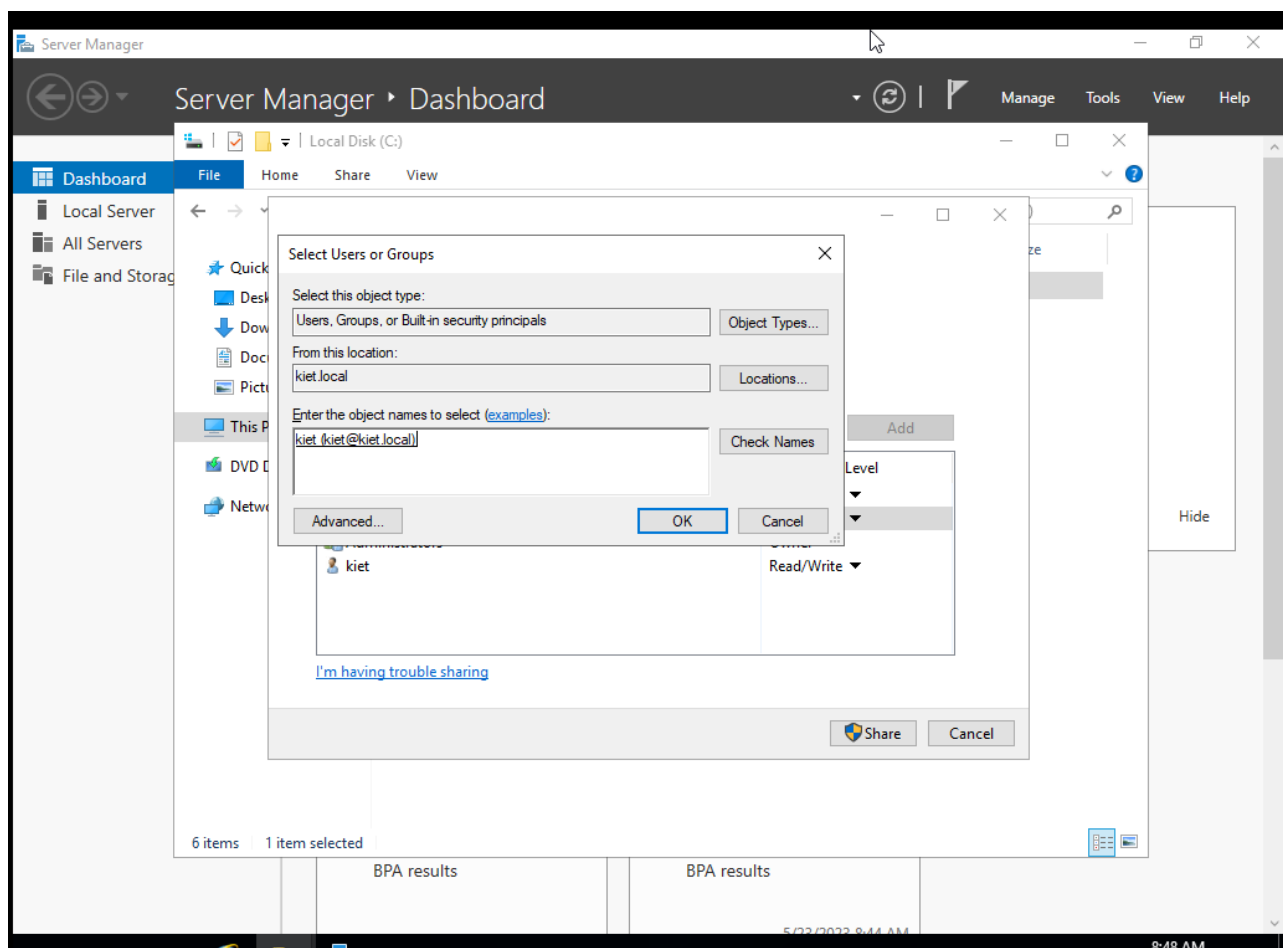

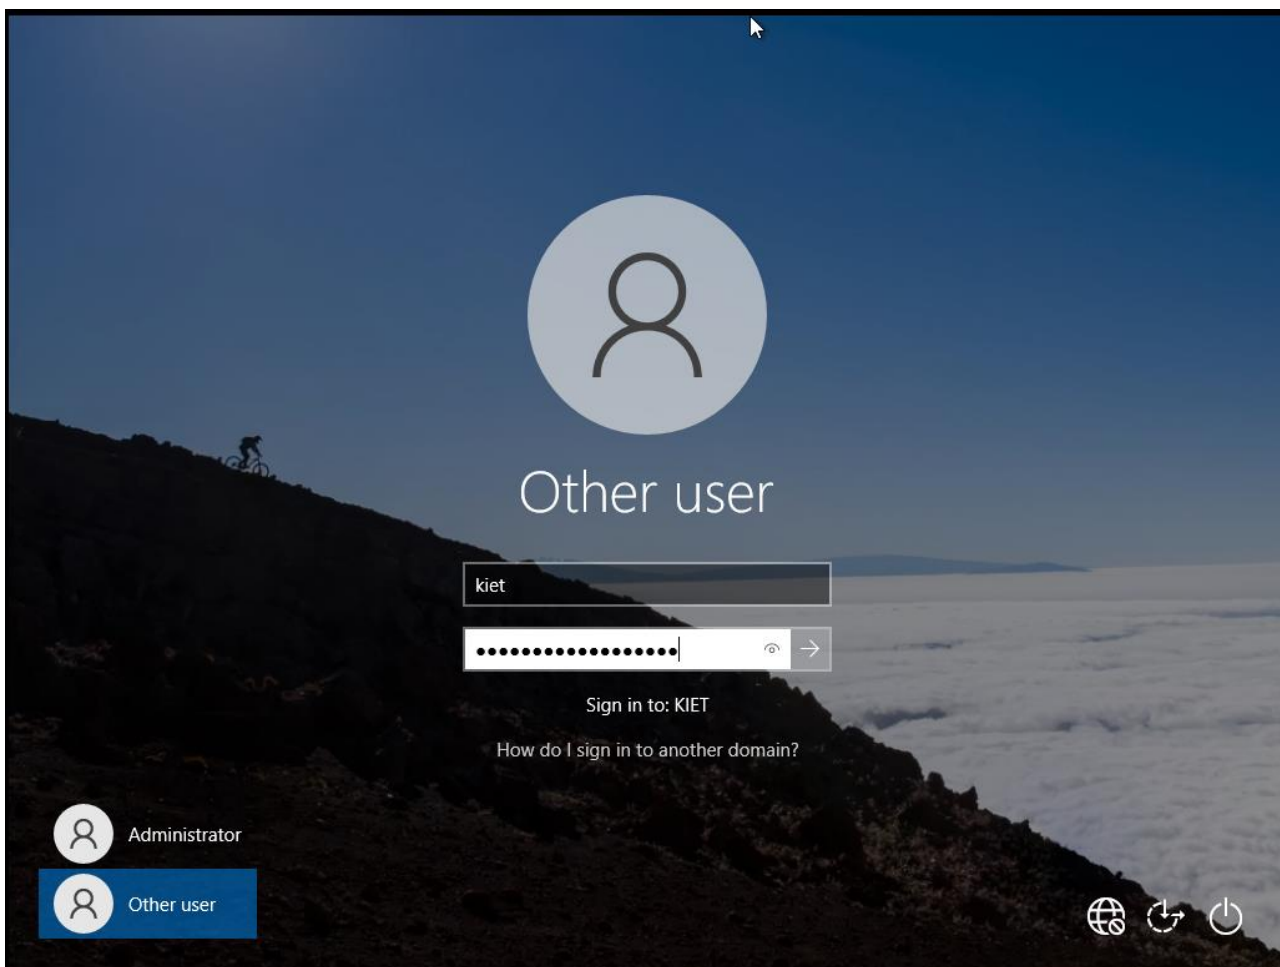

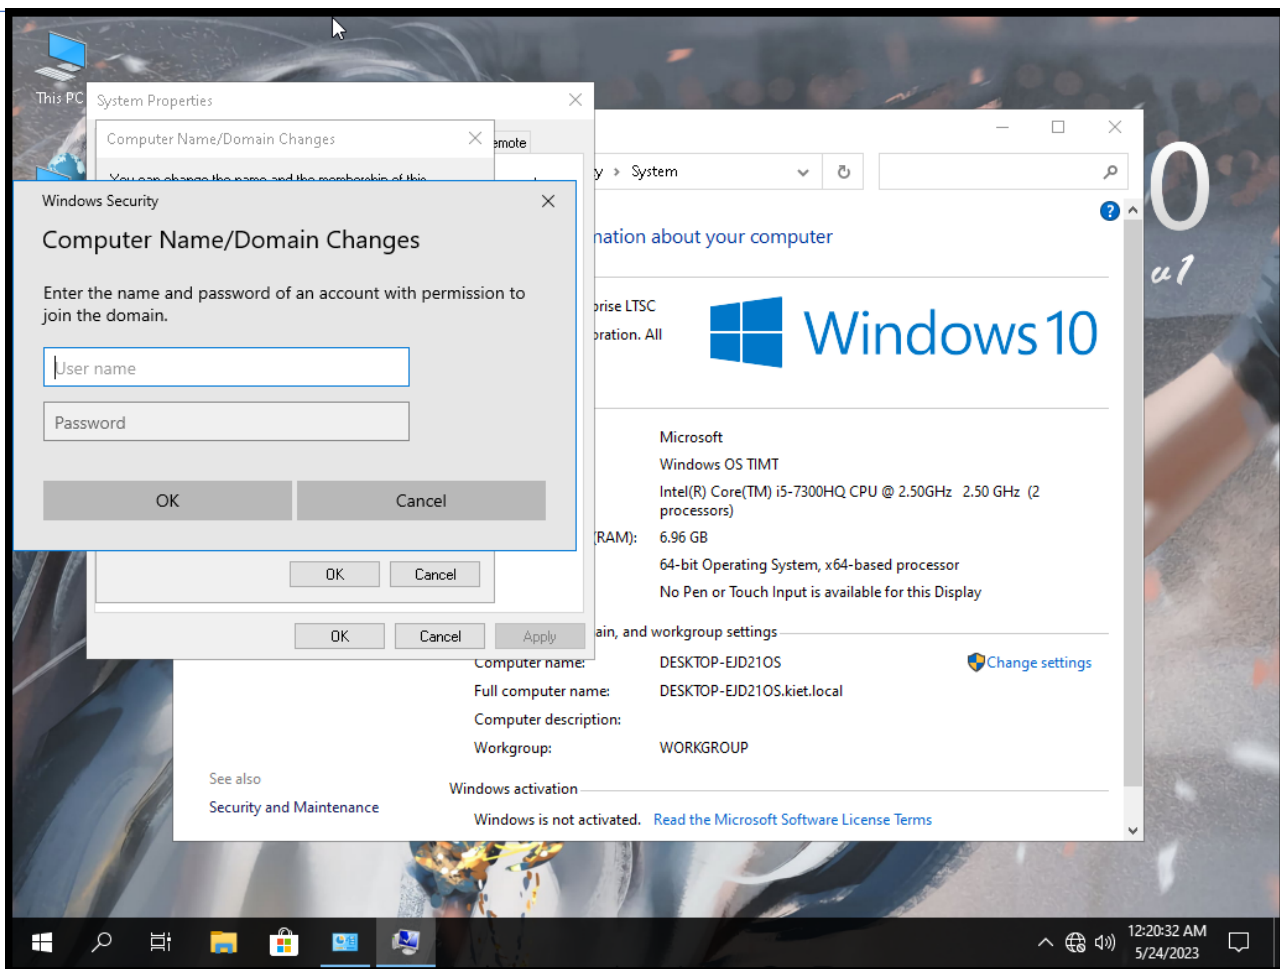

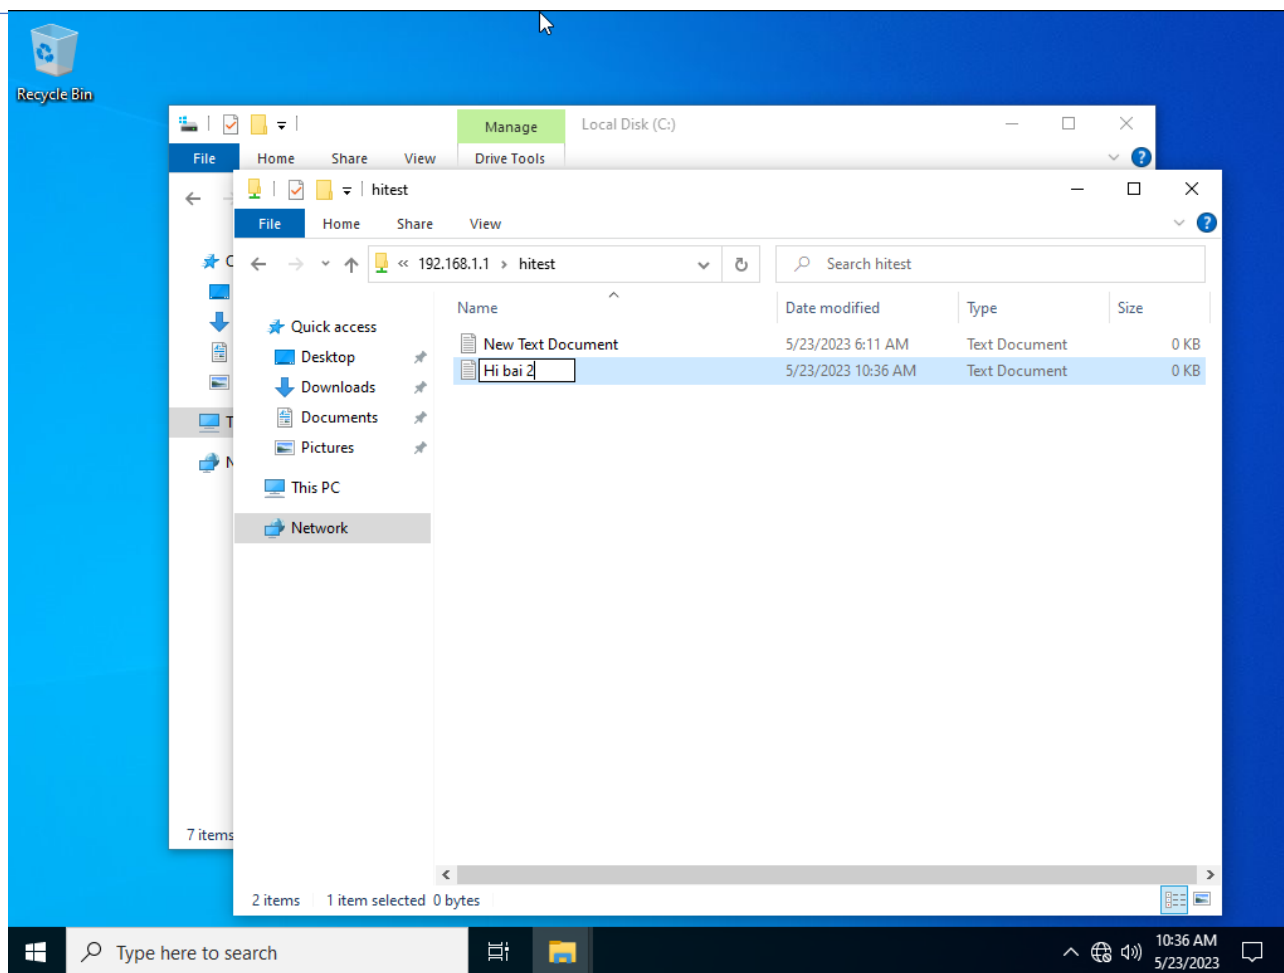

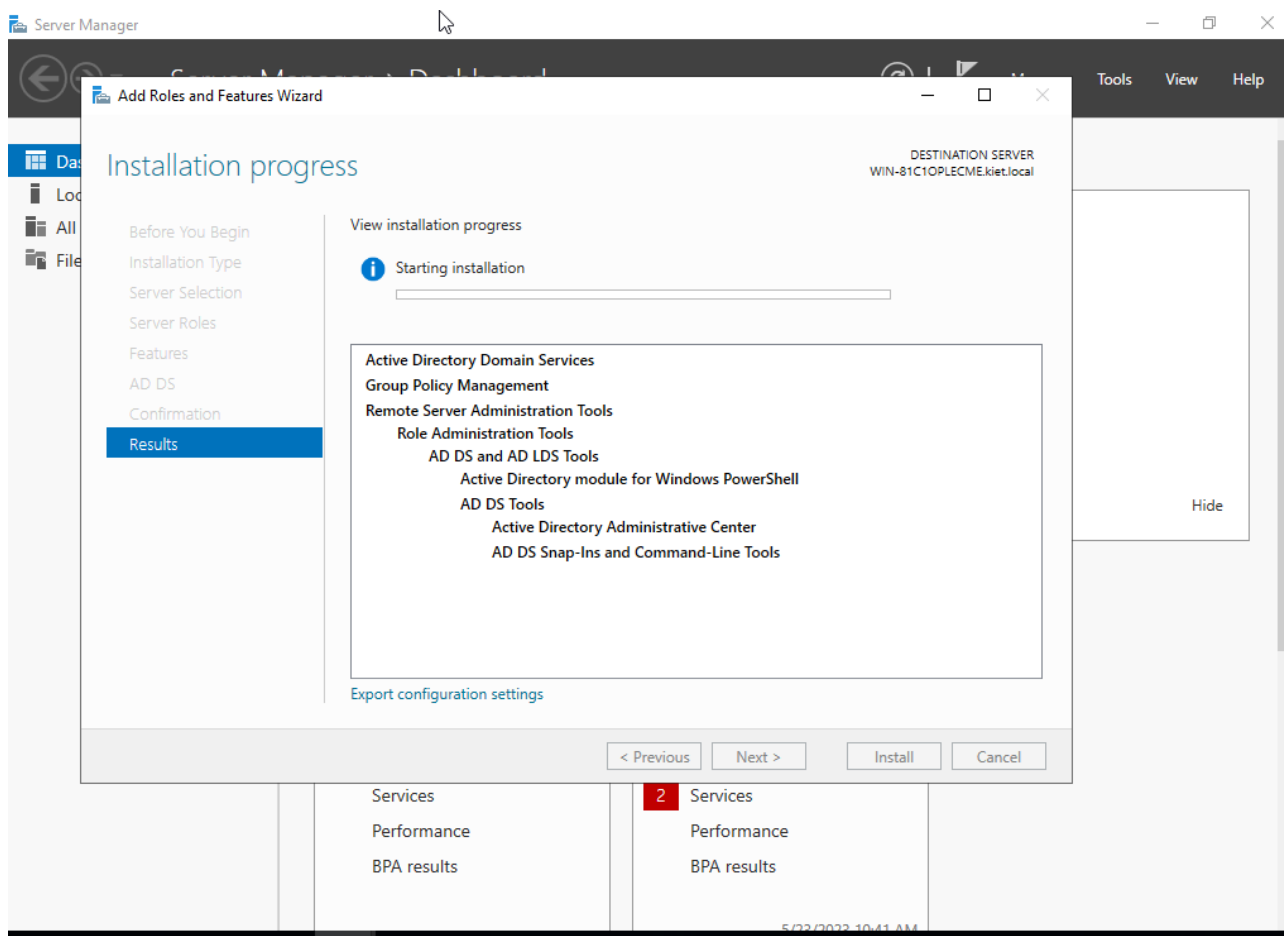

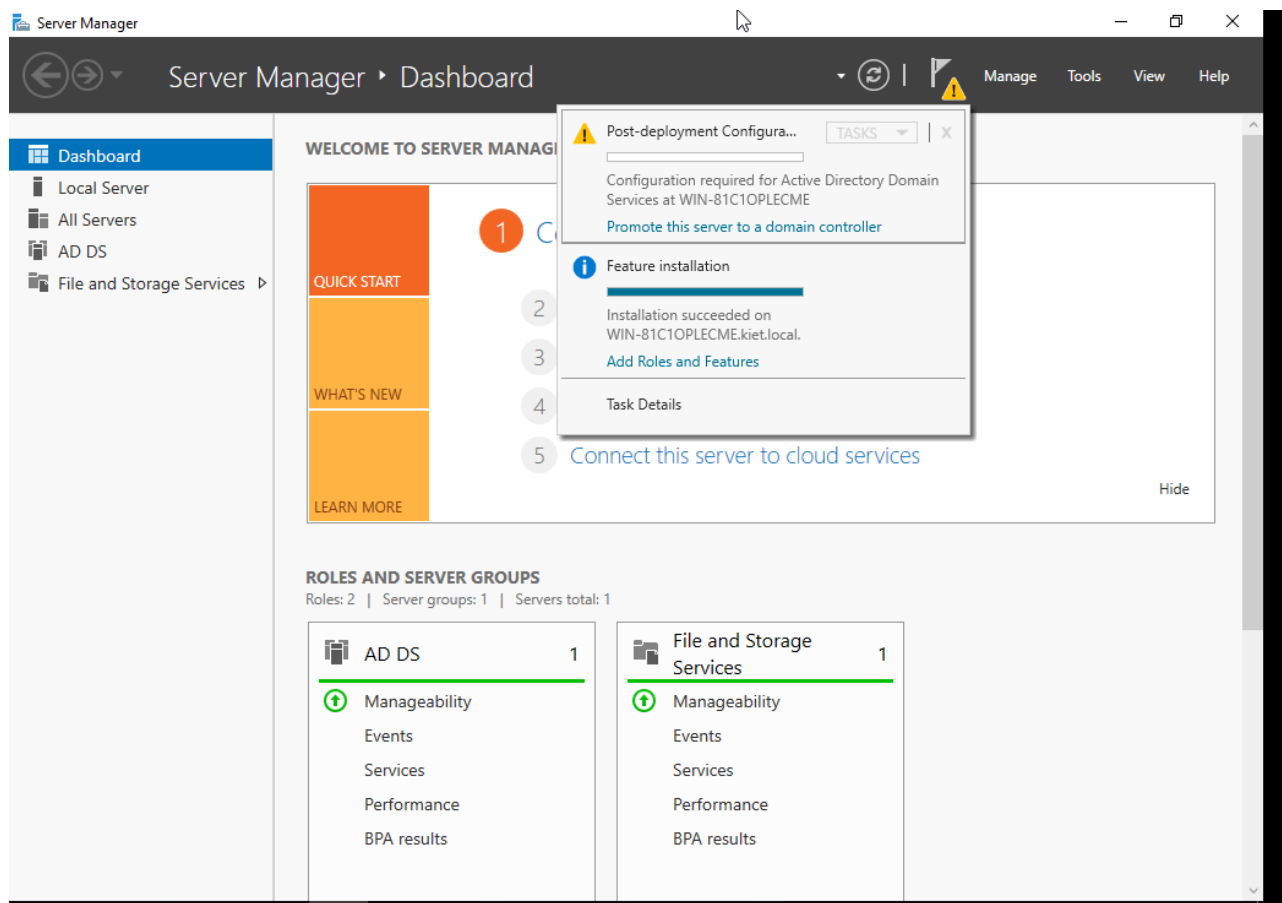

### 3. Additonal Domain Controller

Your PC ran into a problem and needs to restart. We're just collecting some error info, and then we'll restart for you.

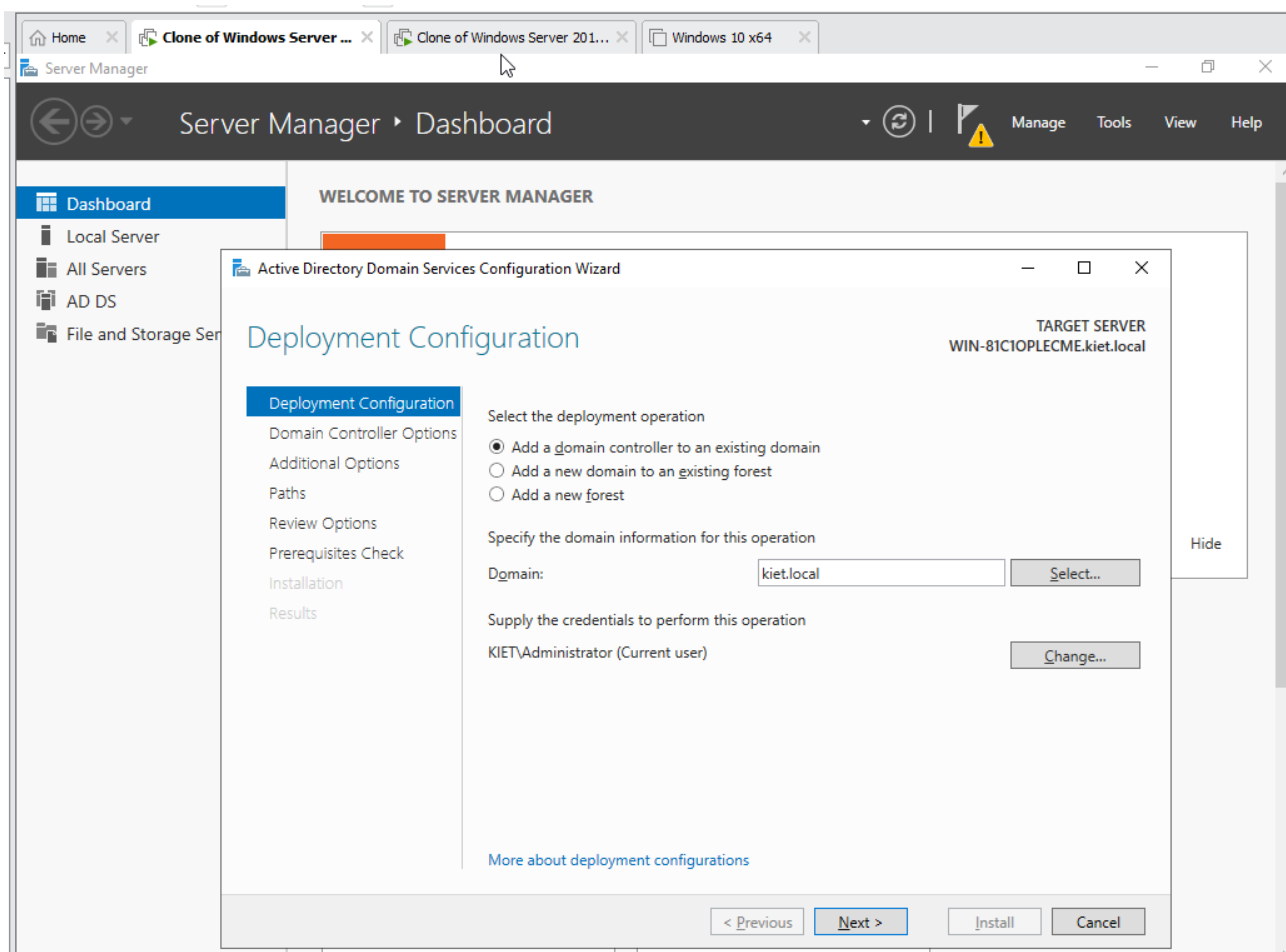

50% complete

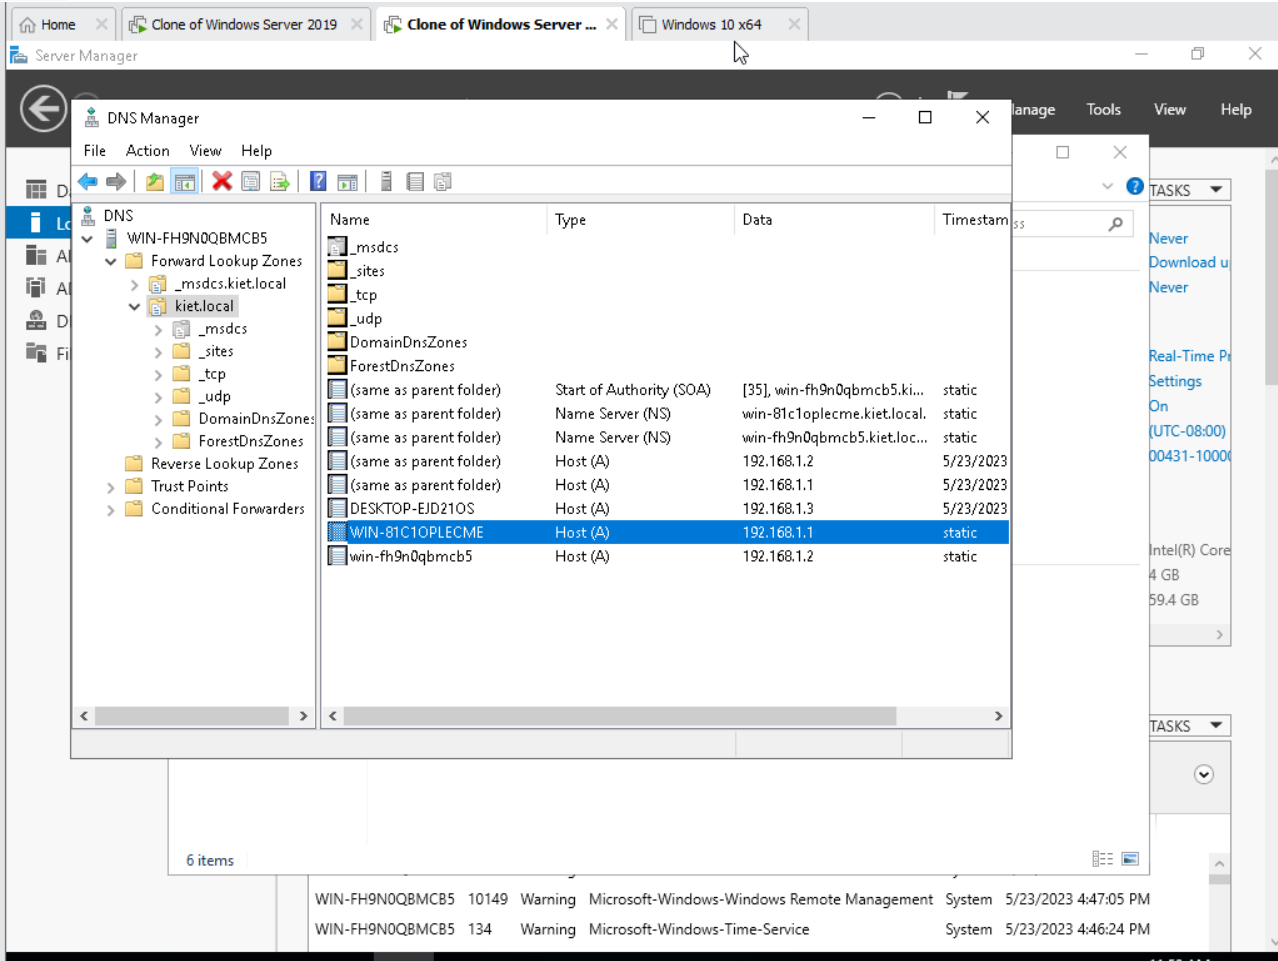

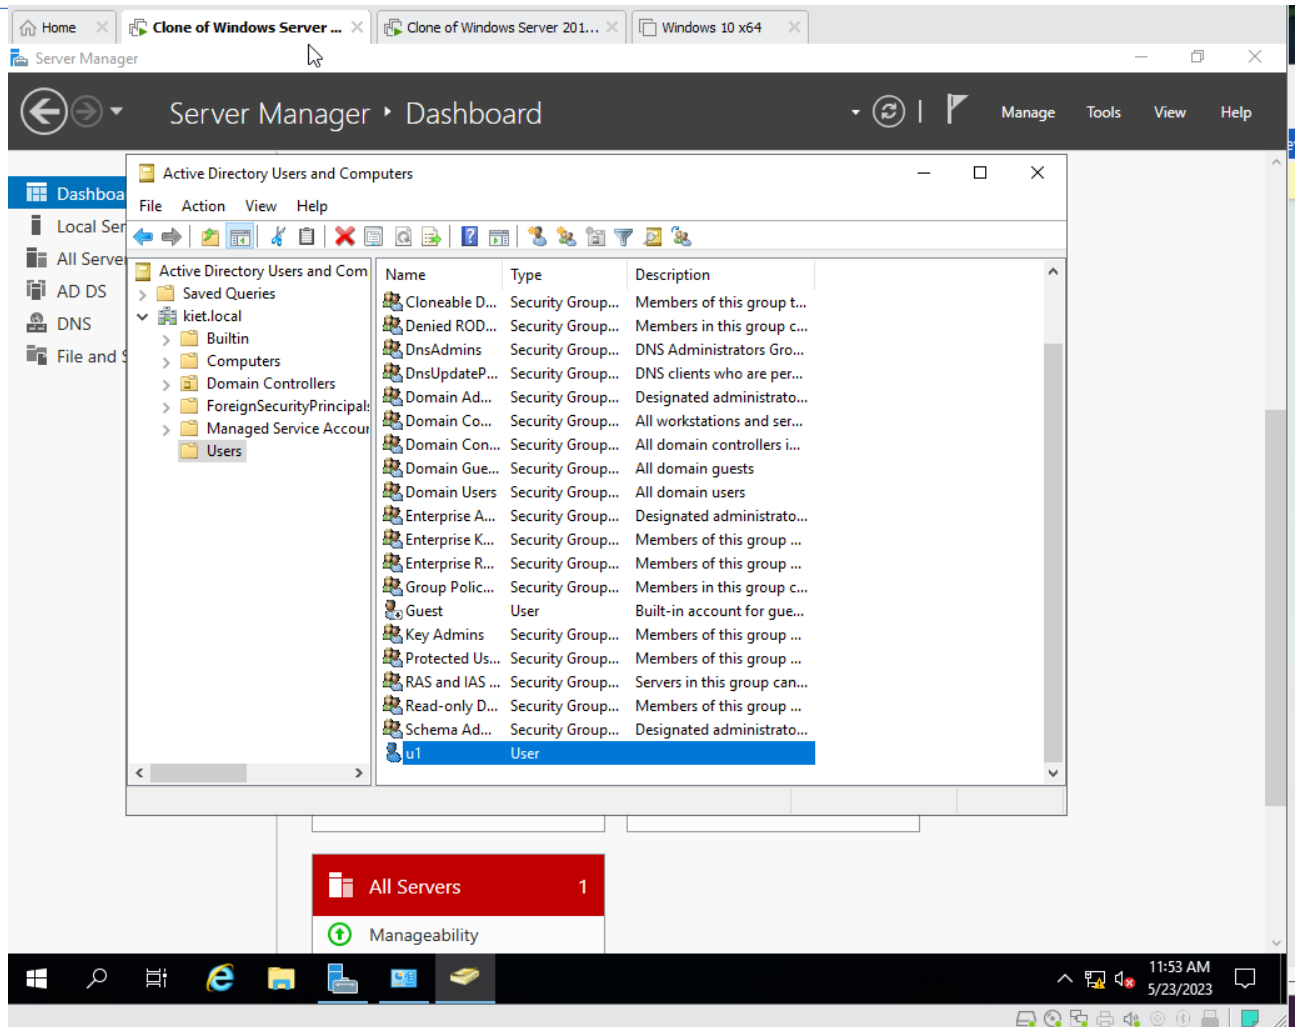

For more information about this issue and possible fixes, visit <https://www.windows.com/stopcode>

If you call a support person, give them this info:

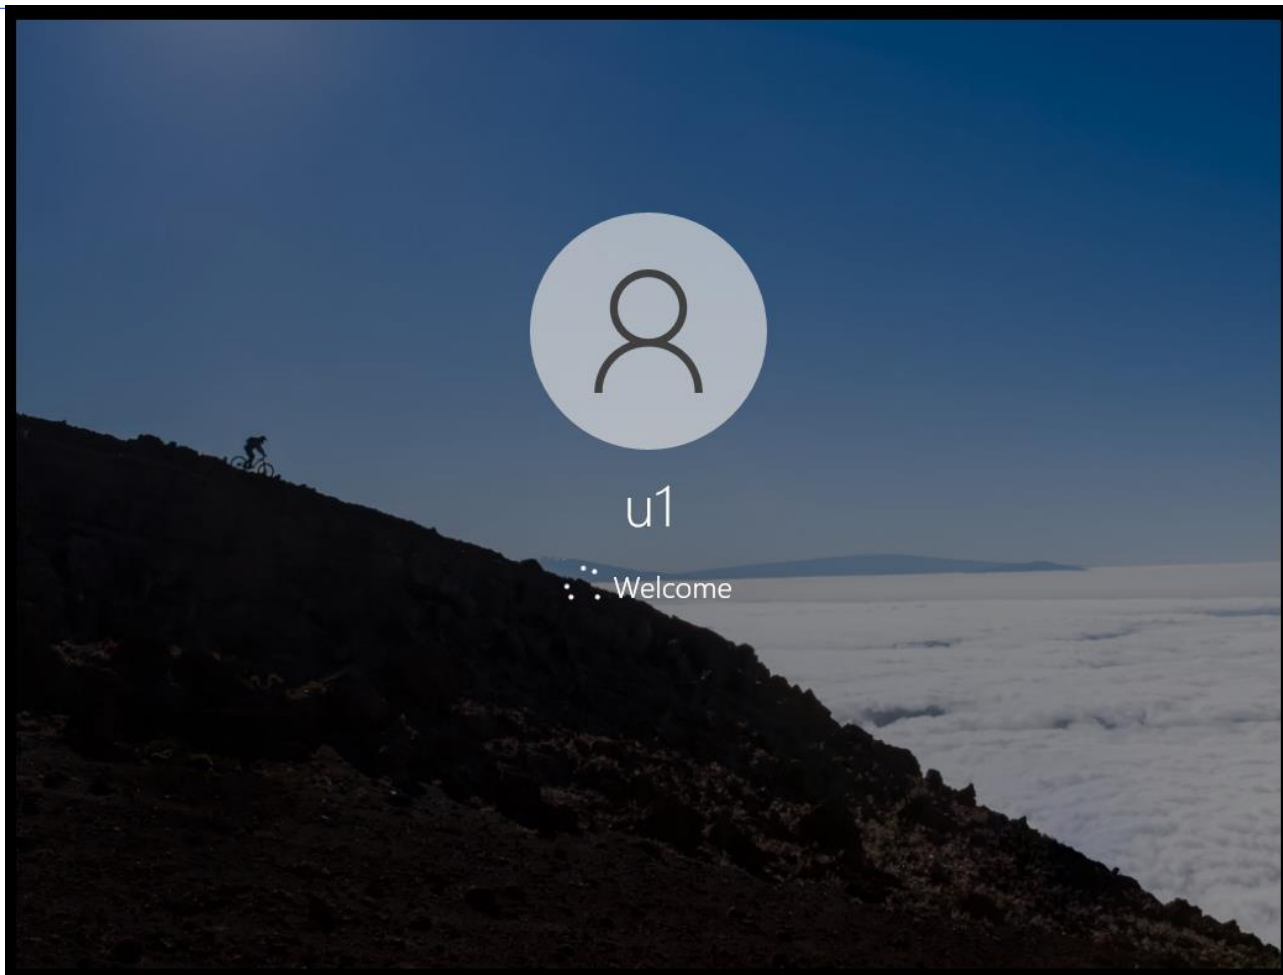

Stop code: CRITICAL\_PROCESS\_DIED

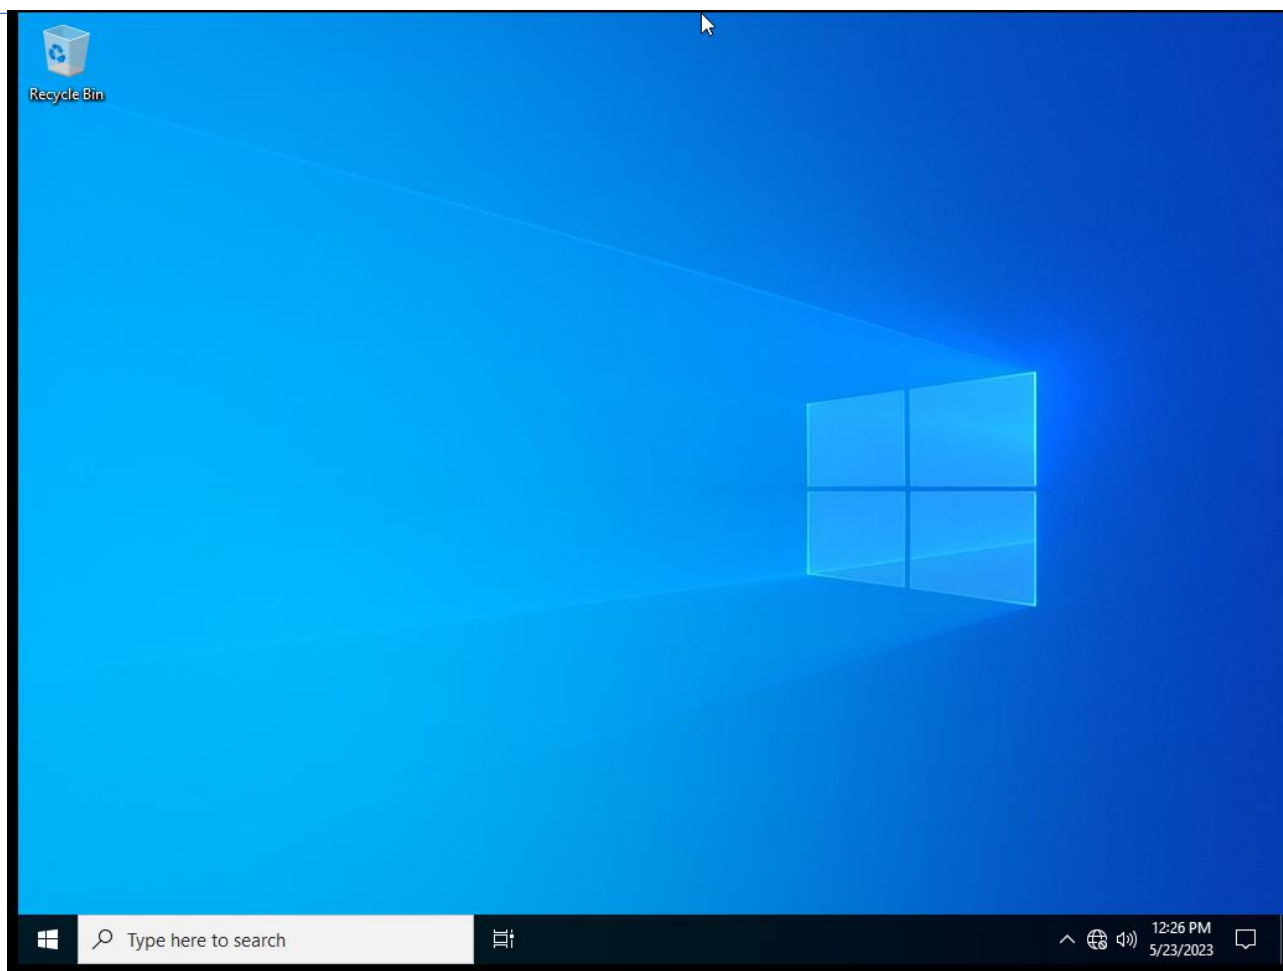

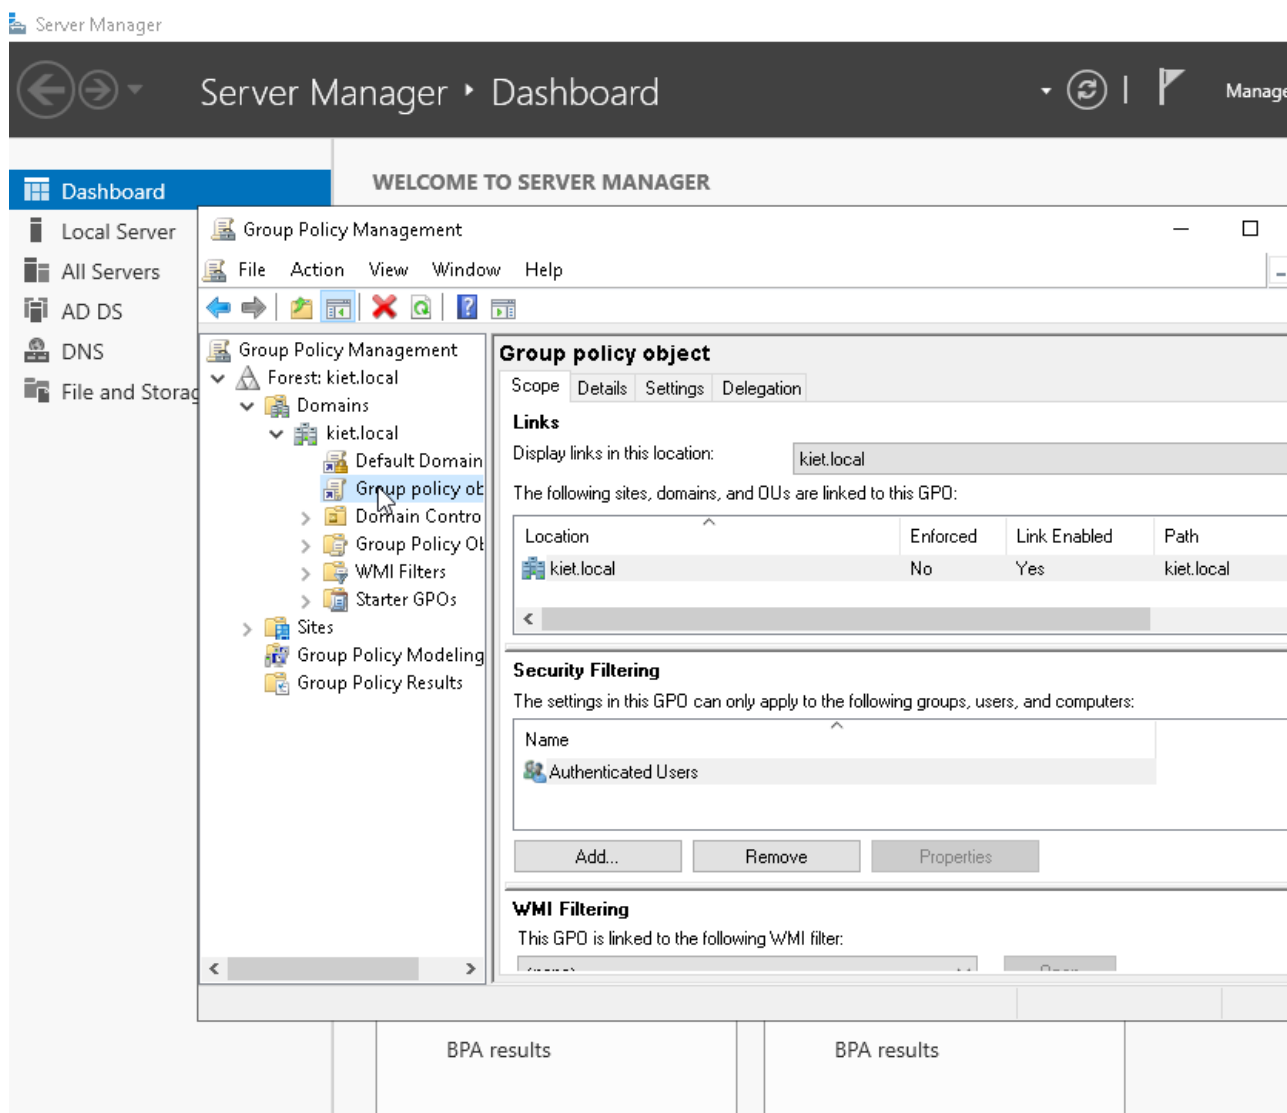

Có thể login máy U1 ở client

Tắt Primary Active Directory vẫn vào được u1

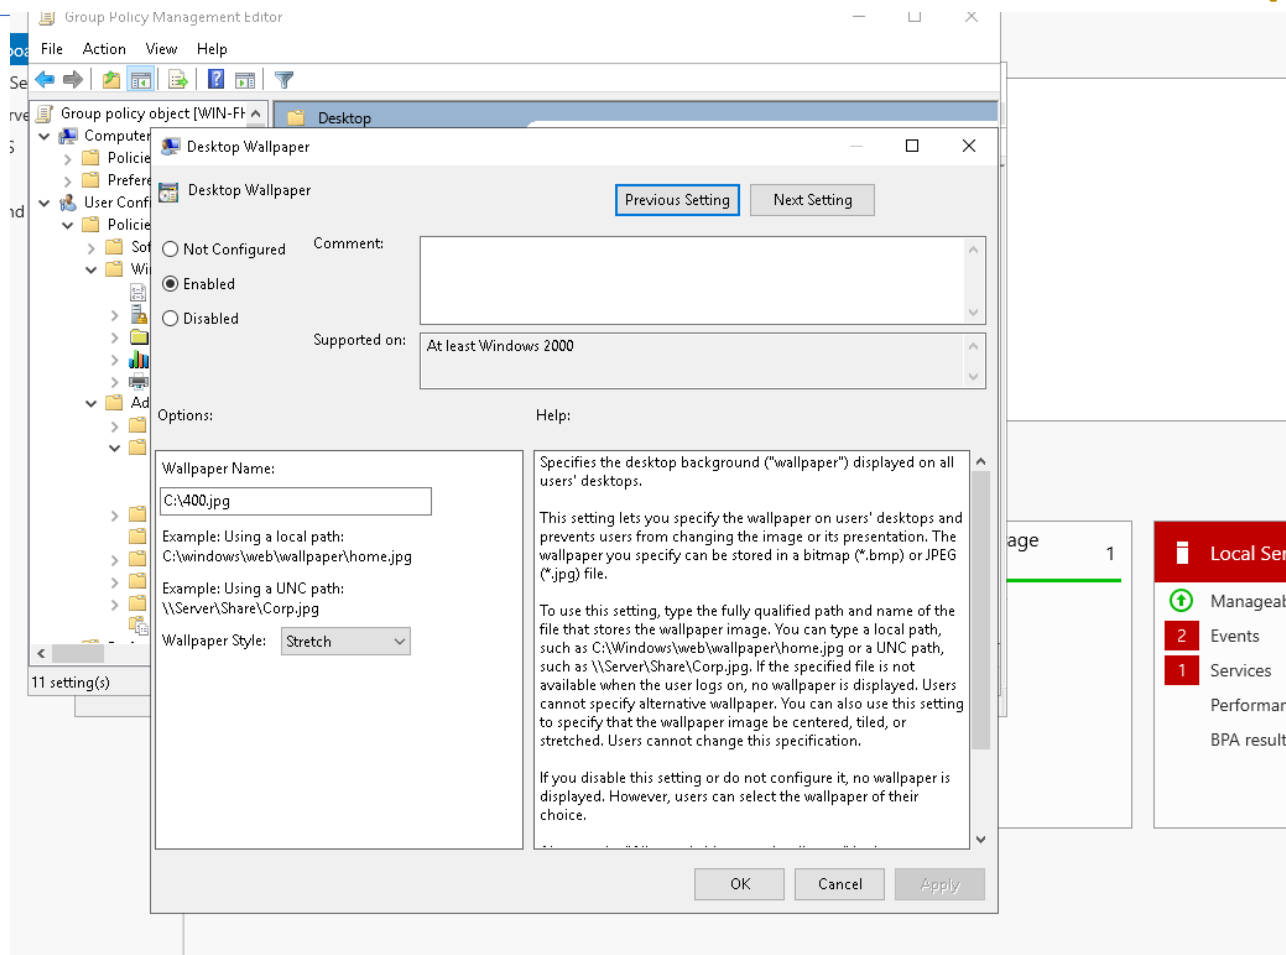

#### 4. The Active Directory Policies

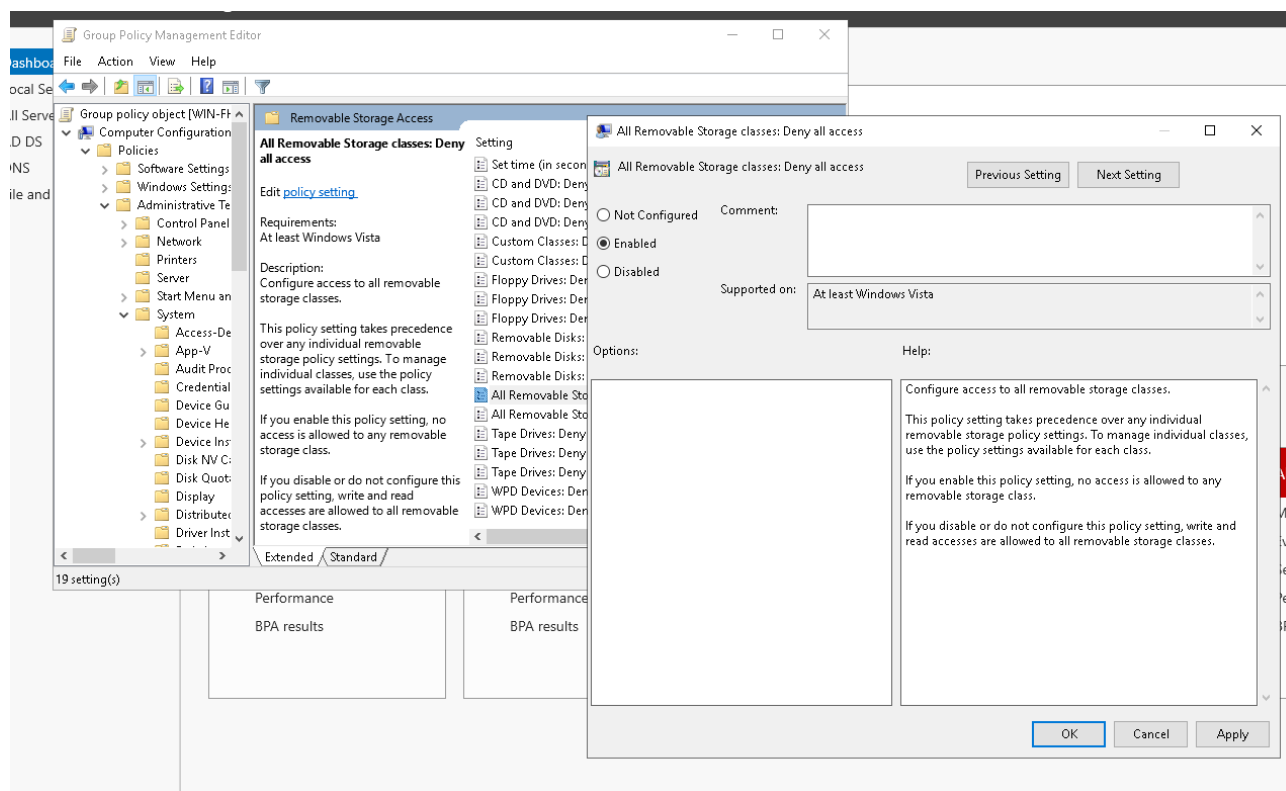

1. Automatically applies the picture specified by the domain's administrator as the wallpaper when the user logs in to any computer.

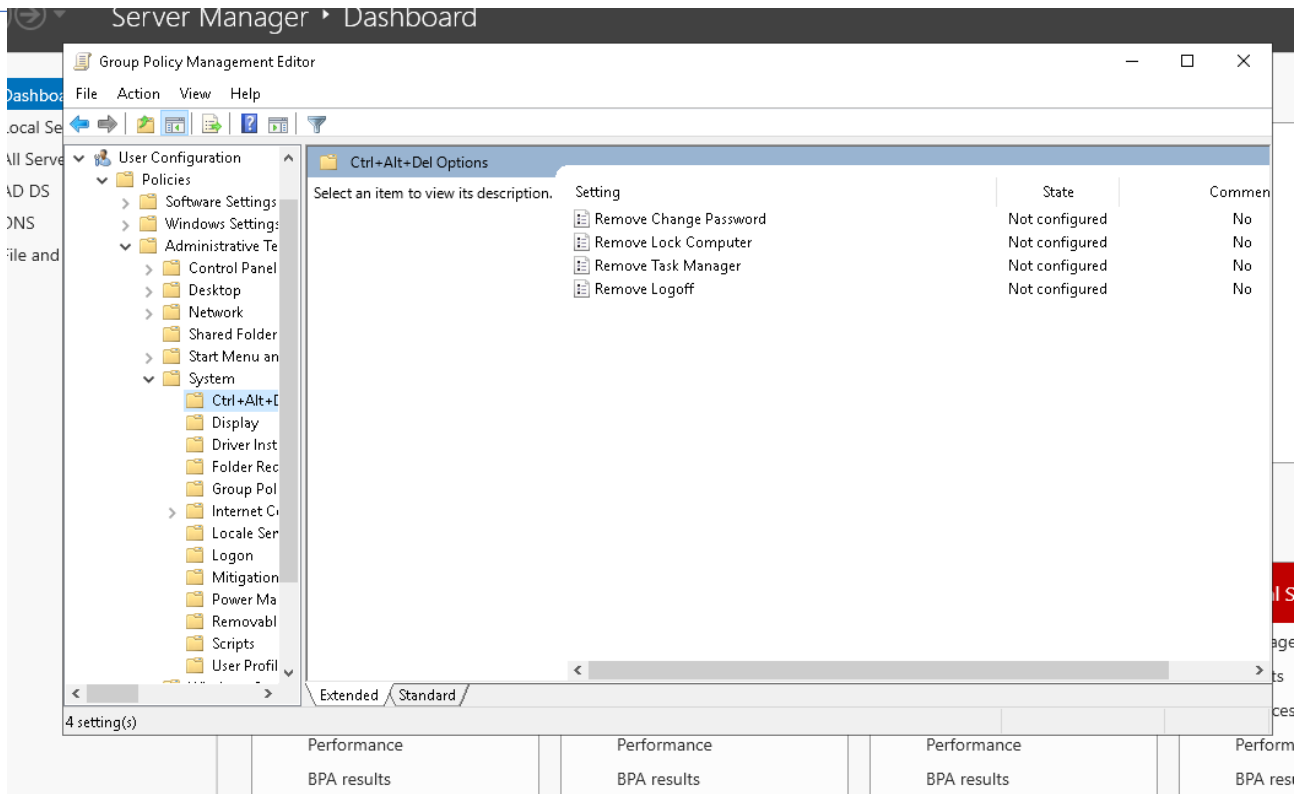

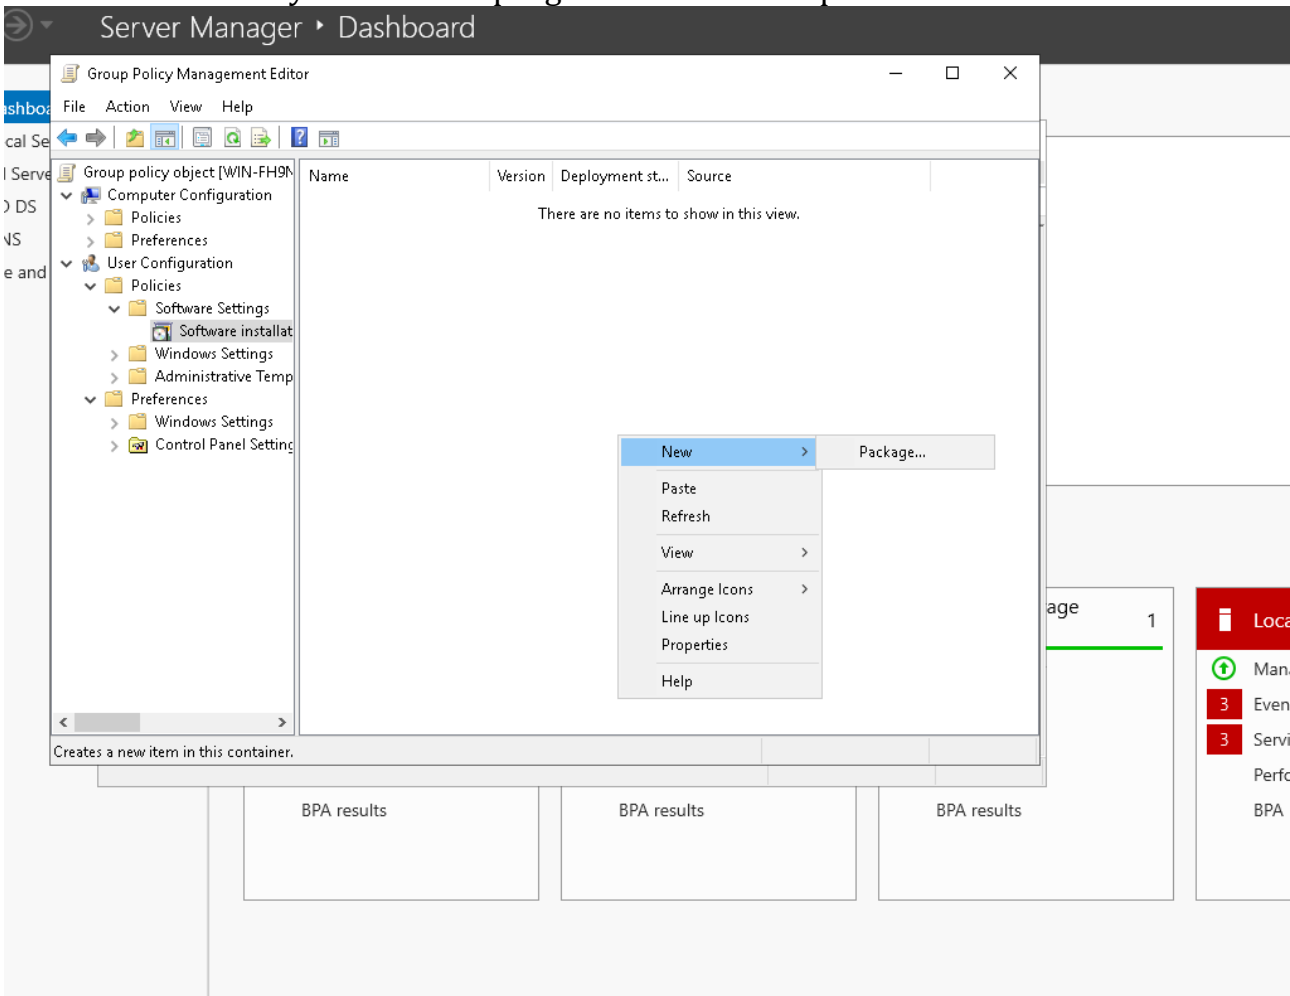

2. Prevent clients from using external storage devices (such as USB, CD, DVD,...).

3. Prevent users on the domain using Task Manager or CMD.

4. Automatically distribute a program to client computers or users.

## 5. Read Only Domain Controller (Advanced task - optional)

Same as ex 3, but at here:
